STOCKHOLM — In a major concession after bilateral negotiations with the Soviet Union, the United States has agreed that the North Atlantic Treaty Organization will give notice of troop movements from North America to En-

rope, diplomats said Wednesday. The concession was made at the 35-nation European disarmament conference, where the NATO allies Corrected Ad Quickly and laste and long resisted Soviet pressure to:

> The U.S. is not meeting conditions for a summit meeting, a Soviet official says. Page 6.

give such information. NATO hadargued that the talks' mandate was mited to continental Europe.

NATO diplemats said the agreement represented a major move by the United States, which in the past had feared that notification could expose some of the alliance's main bave to be worked out. The head of the Swedish delegation, Curt Lidgard, said the matter of the size of the troop movements requiring notification probably would be settled only at the last minute, before the conference ends Sept. 19.
The agreement will apply basi-rally to the United States, its NATO ally, Canada, and the Soviet Union, because it covers troop transfers from outside Europe to the continent and these are the only

countries that do that regularly. Mr. Lidgard said the agreement raised hopes that an overall accord could be worked out before the

conference ends. of negotiations between the superpowers," Mr. Lidgard said, stress-ing that some of the most complex issues facing the conference could be sorted out only in direct talks between Moscow and Washington. NATO diplomats tried to play · 元 ○本 五 四 · · own the U.S. and Soviet roles in

alliance had been involved.

They said the Soviet Union had agreed, in renarn, to the principle of 12 32 36 30 E 15 giving advance octification of troop concentrations.

This was a compromise on NA-TO's original proposal that notification be given of all "out-of-garrison" troop movements. That would See TROOPS, Page 5

An article Monday in the Wall Street Journal reporting that "the United States and Libya are on a collision course again" was attributed by officials in several agencies to staff members of the National Security Council, where the "scare Gadhaii" program was reported to have been drawn up.

Earlier plans reportedly called for U.S. efforts to plant stories in foreign publications that Colonel Gadhafi had become unhinged by the U.S. air raid of April 15 and that plots to overthrow the Libyan leader were under way.

[On Wednesday, the United States sent to Britain 18 jets of the type used in the April strike, but British officials said they were there for a NATO exercise planned six months ago, Reuters reported from London. There were 12 F-111D tactical strike aircraft and six EF-111 aircraft. The U.S. opera-tion from British bases against Libya in April was launched under the cover of an exercise that officials

said at the time was routine.] The objective of the U.S. words and deeds is to frighten Colonel Gadhali into reacting and to embolden possible opponents in Lib-ya into action, according to one

In pursuit of this objective, se-nior administration officials have been encouraging an ominous in-terpretation of such long-planned activities as joint U.S.-Egyptian air exercises in the Mediterranean and a coming trip to West European capitals by Vernon A. Walters, the chief U.S. delegate to the United Nations.

Some administration officials said they were delighted last week when Pravda and other Soviet publications began to denounce the U.S.-Egyptian exercises as the first step toward a new attack on Libya. Defense Department sources

said Toesday that the Sixth Fleet in the Mediterranean was not mobi-lizing for any kind of attack on Libya, despite tough talk in Washington. The sources said, however, that the fleet might conduct another set of flight maneuvers off Libya after completing the U.S. Egyptian Sea Wind exercise on Thursday.
It was reported Toesday that a

port visit in Israel this weekend of the Forcestal had been canceled and that the warship had been ornaval operations in the Atlantic to dered to remain on duty in the hostile inspection and observation. central Mediterranean oear Libya. After completion of the Sea Wind exercise with Egypt, the Forrestal had been scheduled to go into the port of Haifa. But military sources said new orders were issued amid reports in Washington that Colonel Gadhafi was planning new

Kohl Unveils Plan to Limit **Immigration**

By James M. Markham New York Times Service

They said that schools were BONN - Chancellor Helmut closed Wednesday and that stu-Kohl announced a series of meadents who reported for classes were sures Wednesday aimed at stemtold to come back next mooth. The ming a flow of refugees into West government said that most Soweto Germany that he predicted would students were staying away from this year reach a new high of more than 100,000.

"We are not a ration of immigration," Mr. Kohl said at a news conference here. "And we do not hacked Sydenham Mkhwanazi, a

want to become one." The steps include a \$1,000 fine cillor, Sigfried Manthata, was for airlines that carry passengers to West Germany without valid visas. A third councillor, Silas Tshaba-New legislation, which is expected to be adopted in the autumn, would also oblige such airlines to pay for flying rejected asylum-seekers back to their home countries.

Most of the refugees pouring into West Germany — roughly half of them through West Berlin — The Bureau for Information immediately demand political asyhum. But officials say that the bulk seeking a better life in a European

welfare state. As the last West European country with an indulgent political-asy-lum law and relatively porous frontiers. West Germany has become a

asylum-seekers has led to angry

Mr. Kohl said Wednesday that Third World asylum-seekers would be banned from obtaining work in West Germany for five years, which is an extension of an existing two-year ban. An exception will be made for refugees from Communist Europe, who may work after

one year. For two decades, West Germany has followed a policy of not repatriating any exile from a Communist state in Europe. The chancellor said this explained the more favorable working conditions for East Europeans under the new regula-

Other steps adopted include an obligation for travelers from such "problem countries" as Lebanon, Syria, Ghana, Pakistan and Bangladesh to obtain transit visas to pass through a West German airport. Many refugees book flights to other destinations but, on landing in Frankfurt, leave their airplanes and demand asylum in the airport.

West German border guards will also be strengthened with experts who will determine whether potential asylum-seekers are simply economic refugees, who may be refused entry. Already, particularly in West Berlin and at the frontier town of Helmstedt, some refugees have been turned away immediately after officials have summarily determined they were not fleeing political persecution.

Mr. Kohl has summoned a meeting of national and regional political leaders to discuss the refugee problem on Sept. 25. West Germaoy's federal system has led to widely varying approaches in different states, which makes it difficult for Bonn to establish consistent proce-

The chancellor is known to want to propose creating camps for asylum-seekers, rather than having them distributed in bomes and other private buildings, and to speed up the consideration of asylum petitions. While only about 16 per-

In Guadalajara, Drug Agent's Ordeal Was 'a Minimal Incident'

By Alan Riding

New York Times Service

GUADALAJARA, Mexico - For many outsiders, the reports that a U.S. narcotics agent was tortured This is the result of six months here this month merely consolidated Guadalajara's reputation as a violent city held hostage by drug barons and corrupt policer

After all, it was here that hundreds of Mexicans, as well as seven Americans, were killed in drug-related crimes in 1984 and 1985. And even now the U.S. Drug Enforcement Administration regards Guadalajara as one of a half-dozen major narcotics centers in Latin

The latest compromise and said that Yet for many topatos, as natives of Guadalajara are all the members of the Western known, what U.S. officials say was the arrest and mistreatment of the American, Victor Cortez Jr., by Jalisco state judicial policemen on Aug. 13 was, in the words of Governox Enrique Alvarez del Castillo, just "a minimal incident."

Contrary to outside impressions, local people say that Guadalajara's four million residents are incomparably safer and its streets are quieter now than 12

"Cortez got away with his life, didn't he?" one businessman said, with only a trace of sarcasm.

largest city is floating between two conflicting images: By broader Mexican standards, it remains vinlent and corrupt, but by Guadalajara's own recent standards, things are definitely improving.
"Make no mistake, this is still a pretty wild town,"

one longtime resident said, "but we have ooticed the difference. We can go out at night without getting caught in a shoot-out between traffickers. It was really spectacle before."

The change began with the arrest 15 months ago of two of Mexico's top five traffickers, Rafael Caro Quintero and Enrique Fonseca Carrillo. They had bought or shot their way to vast power, but even their influential friends could not help when they were linked to the February 1985 murder of an American drug agent, Enrique Camarena Salazar, and his Mexican pilot, Adolfo Zavala Avelar.

There was soon a marked drop in the number of street battles between rival gangs and, along with some other smugglers of cocaine, marijuana and heroin, the remnants of the Caro Quintero and Fonseca organizations either left town or went underground. Most of the hotels, restaurants and discotheques

built or bought by traffickers to hide their drug reve-

to the Spanish police. The French crackdown has de-

lighted the Socialist government in Madrid, which had complained in the past of a lack of understanding in Paris for its undeclared war against Basque extremists.

But Ihaki Bariola, secretary of the nonviolent Basque Nationalist Party in the San Sebastian area in northeastern Spain, said, "The French expulsions have destabilized the political situation on this side of the border." He cited a sudden upsurge in bombings and protest demonstrations, adding, "It's simply fueling the cycle of violence.

Its apparent retaliation for the deportations, a group calling itself the "Refugee Aid Committee" has set fire to about 30 cars with French license plates in the Spanish Basque country.

Demonstrations against the expulsions also have taken place in several French towns, including Saint-Jean-de-Luz, a picturesque resort on the Atlantic Ocean. The towns in the past were regarded as natural places of refuge for Basque

The Basque region straddles the the Spanish industrial city of Bilbao in the south to the French port city of Bayonne in the north. But the 250,000 French Basques traditionally have been less influenced by nationalist ideas than their 2.5 million Spanish compatriots.

Christiane Fando, a lawyer representing many Basque exiles in France, accused the French gov ernment of violating its own laws by failing to produce adequate evidence to support terrorism charges against the deportees. "The French police are simply

expelling people on the basis of assertions that they are dangerous terrorists," she said. "They haven't produced any proof. They are simply rounding up people on a list that appears to have been drawn up

The French government insists that it has the right to expel any foreigner whose presence is considered a danger to public order. Officials say that the case for granting asylum to Spanish Basques has weakened now that Spain is a mem-

Cornel Pacoste and Dimitrie Ancuta were named deputy prime ministers, replacing Mr. Totu and Ion M. Nicolae, a former ambassador to the United States and foreign trade minister, who was given "other tasks." Petre Gigea was replaced as finance minister by Alexandru Babe.

Chad Rebel Factions Are Said to Fight

PARIS (AFP) - A breaksway faction of the Libyan-backed rebel, movement in northern Chad has taken control of the strategic Fada oasis after fighting in which 30 persons were killed, Chadian sources in Paris

The sources said the fighting took place last Friday between the Transitional Government of National Unity, as the mainstream insurgent group is known, and the Democratic Revolmionary Council. The council was formerly the largest component party of the Transitional Government, which is led by a former president of Chad, Goukouni

Mr. Goukoum's forces have held oorthern Chad since 1983, after an offensive against forces loyal to President Hissene Habre, but the movement has been riven with dissension in the past 18 months. The Chadian sources said Libyan authorities were trying to mediate between Mr. Goukouni and the leader of the breakaway faction, Acheik bin Oumar, who were both in Tripoli.

Turkish Attack on Kurds Worries Iran

TEHRAN (Reuters) - Iranian leaders, in talks Wednesday with the foreign minister of Turkey, voiced concern over a Turkish raid on

Kurdish rebels in northeastern Iraq, Tehran radio said. It said that President Ali Khamenei told Vahit Halefoghi, the visiting Turkish minister, that "the least our brave and sensitive people expect from a neighboring country is to remain neutral" in the Gulf war.

The radio said Mr. Halefoglo told Mr. Khamenei and Prime Minister

Mir Hussein Moussavi that there had been no change in Turkey's neutrality. The Iranian Foreign Ministry deplored the Aug. 15 air raid and said that Turkey should not hinder movement of Kurdish fighters opposed to the Iraqi government. According to the radio, Mr. Halefoghi said the raid was to defend the territorial integrity of Turkey, which is fighting Kurdish separatists in southeastern Turkey.

FBI Dismisses Agent Awaiting Trial

WASHINGTON (UPI) - The Federal Bureau of Investigation has dismissed Robert S. Friedrick, an FBf supervisor in Cleveland indicted on charges of lying in connection with an investigation of Jackie Presser, the president of the Teamsters union, an FBI spokesman said Wednesday. The spokesman refused to provide details, citing "privacy consider-

Republican Goal: Gubernatorial Majority

Governors Seek Control Over Guard

By David S. Broder

Washington Post Service HILTON HEAD, South Carolina - Governors of both parties have warned the Reagan administration and Congress that they want to decide for themselve whether to send their National Guard troops on training missions to Central America.

Members of the National Governors Association unanimously approved a policy statement on Tuesgives them control over National Guard troops in their states during

Critics and supporters alike of administration policy in Nicaragua and its oeighbors joined to reaffirm the governors' traditional com-

mand over the National Guard. After several governors refused in the past year to allow their Quard troops to participate in so-called training missions in Hondu-ras, the House of Representatives passed legislation allowing the president to override such vetoes. Arizona's Democratic governor, Bruce E. Babbitt, a 1983 presiden-tial hopeful, said he had blocked the request for his Guard troops to train in Honduras because it is "part and parcel of the Reagan

administration effort" to "involve us in war in Central America."
Governor John Ashcroft of Missouri, a Republican, who visited his Guard troops in Honduras, said they were on "a training project and nothing more," but he also

supported the resolution. Democrats and Republicans agreed that while the president is empowered to call up the National Guard in case of emergency or mil-itary conflict, in peacetime there is oo excuse for overriding a gover-

nor's objections. On the final day of the association's annual meeting, the gover-nors also urged federal help in re-solving the liability-insurance crisis on the state level. They called for passage of a national product-li-ability code and tighter oversight of the insurance industry.

The resolution, reversing previous association policy, conceded that the insurance crisis has become such a threat to interstate commerce that the states, traditional regulators of the insurance industry, could not solve it.

The new policy statement of-fered only the broadest guidelines for federal regulation, however. Winding up their three days of

Bruce E. Babbitt

day saying the U.S. Constitution discussion on education policy, the state executives heard the pollster Lou Harris say that voters "are arguments that voter willingness to ready for very drastic action" of the kind the governors have recommended, including substantially increased teachers' pay for improved education performance.

> public and 65 percent of business leaders would support higher taxes on themselves to get "higher quali-ty education." But be conceded that a oumber of surveys, including at a oumber of surveys, including his own, showed opposition to higher taxes to maintain the current level of education.

In a recent Gallup Poll, for example, most respondents opposed increasing income, local property or gasoline taxes to pay for addi tional state spending on education. Instead, they favored raising reveoue for that purpose from state this year because of ineligibility of lotteries and increased taxes on alcohol and tobacco.

The Gallup poll also found apparent public sympathy for many of the governors' proposals, includ-ing national standards for teachers, expanded preschool programs and parental freedom to choose chil-

36 States to Elect New Chiefs

By Bill Peterson Washington Post Service

HILTON HEAD, South Carolina - Republicans have left the National Governors Association meeting here predicting significant gains in gubernatorial elections on

Currently outoumbered by Democrats 34 to 16. Republicans said in interviews Tuesday that only one of their incumbents, Governor Terry Branstad of Iowa, is in serious danger of oot being reelected. They said they expect a net gain of up to 10 governorships.

That would give the Republicans a majority among state chief executives for the first time since 1971. It would also help bolster the party's send a Republican to the White House is translating into willingness to send Republicans to governors' mansions as well.

A governorship is one of the best Mr. Harris said a survey he had measures of a party's strength at taken showed that 77 percent of the the state level. Governors control large budgets and patronage appointments and set the agenda for debate in their states.

Pennsylvania's Republican gov-ernor, Riehard L. Thornburgh, views the upcoming election as a chance for his party "to carry the Reagan revolution beyond the Capital Beltway."

But regardless of which party wins a majority, the elections will put a different face oo government for millions of Americans, At least 18 states will elect new governors incumbents to run again, retirements and defeats. Not since the 1960s will so many new governors have been elected.

Republicans say their party will be the victor even in the worst of circumstances. "My worst-case scenario shows a net gain of six gover-oors, which would bring us up to 22

Incumbent Loses Alaska Primary

unopposed in the primary in his bid for a second term.

Republicans," said Mr. Thornburgh, the Republican Governors Association campaign chairman. "My best-case scenario would give us a pickup of eight to 10 seats."

Democrats dismiss such talk. "It's premature to put numbers on the governors' races," Paul G. Kirk Jr., the Democratic National Committee chairman, said Tues-

day, predicting only that Democrats "will cootinue to hold a majority of governorships." Democrats hold 27 of the 36 seats on the ballot this year, and with 14 of their incumbents not seeking re-election, they are unusually vulnerable. Part of the problem is that the party did well four years ago, capitalizing on the recession-

year economy. The Republicans' greatest hopes rest in the states where incumbent Democrats are not in the running: Arizona, Colorado, Florida, Idaho, Kansas, Maine, Nebraska, Oklahoma, South Carolina, New Mexico

and Wyoming. President Ronald Reagan carried each of these states by large margins in 1984, and GOP candidates are ahead in polls in all of them except Idaho, Nebraska and

GOP candidates have leads in polls in all of the nine Republican governorships on the ballot, but close races are expected in Oregon, Iowa, Pennsylvania, South Dakota

and Tennessee. "Any problems we have is because we have the most at risk," said Charles Dolan, executive director of the Democraoc Gover-

oors Association. Both parties have faced embarrassments. Republicans have been unable to field credible challengers in Massachusetts and New York. Democrats virtually assured the reelection of Governor James R. Thompson Jr. of Illinois when they elected two supporters of Lyndon H. LaRouche Jr., the far-right conservative, on the same ticket as Ad-

lai E. Stevenson 3d, a former U.S.

senator, Mr. Stevenson is now run-

ning on a third-party ticket. In Idaho, Repoblican strategists complained that their nominee, Dave Leroy, has wasted the national party's funds on campaign coloring books and bookmarks that have his name on one side and a portrait of Jesus on the other.

Women could also gain governorships in the November elections. Governor Madeleine M. Kunin leads a three-way race in Vermont, and women are also running in Oregoo and Arizona. Gov-ernor Martha Layne Collins of Kentucky is not up for re-election.

Sanctions, but Carefully

affected by sanctions imposed against it. Pretoria can slough off upon them the painful effects (such as unemployment) of any slowdown of economic activity caused by sanctions. Or it can punish those neighbors who support sanctions. For their endorse-ment of Commonwealth sanctions, Zambia and Zimbabwe are already paying. South Africa's railroads and ports handle most of their trade, and it is making its displeasure felt. Some other states in the region, however, though they bave no different view of apartheid, feel too weak and dependent to follow the example of Zimbabwe and Zambia. South Africa has shown itself able and ready to wreck their economies and destabilize their governments, so Angoia, Mozambique, Botswana, Tanzania, Lesotho, Swaziland and Malawi are bolding back.

None of this is news to those familiar with the sinews and strategies of South African power. Yet much of the Western debate over sanctions has gone on in some innocence of these realities. There has been a tendency to assume that tough Western pressure, something on the order of a sharp blow, would bring bome to Afrikaners the need for prompt political change. There has been a corresponding tendency to ignore

Because of South Africa's overwhelming economic and strategic weight, all of its black-ruled neighbors stand to be deeply affected by sanctions imposed against it. We think there is good reason for the United States to join other countries in a

certain kind of sanctions -as in the Senate bill. Such sanctions cannot reasonably be expected to bring the apartheid regime to its knees, but they send the message that one sure cost of resistance to democracy is deepening alienation from the West. Even with these sanctions, however, South Africa can inflict further harm on its involuntary and very junior economic partners. It seeks to show that it can endure Western sanctions and dish out tougher ones itself.

Jesse Jackson for one, visiting in southern Africa, has come to the view that sanctions against South Africa must be combined with broad Western assistance and protection for its neighbors. Otherwise, be warns. Pretoria will retaliate and "outflank us." It is late in the day to be arriving at this perception of South African capabilities. Only on a realistic basis, however, can good policy be made. The first requirement is to go slow on steps against South Africa whose burdens for others have not been adequately anticipated. No policy against apartheid can work that cannot be sustained.

- THE WASHINGTON POST.

A Hazard in the House

Man's move from the cave to the house was not as salubrious as expected. Thousands of householders are discovering a bizarre hazard of living indoors - radon gas that seeps in from the soil and increases the risk of lung cancer. This is no marginal menace. Almost every bouse has some radon, and up to 12 percent of America's 75 million houses may have enough to warrant remedial action. But experts disagree on what the action level should be, and so far there is no standard method of proofing a house against radon. The government, to which the pohlic looks for leadership, still lacks the knowledge to give specific advice.

The hazards of radon have been recognized only recently. Officials monitoring radiation after the Three Mile Island accident in 1979 discovered elevated indoor radon levels in eastern Pennsylvania, but official attention did not pick up until De-cember 1984 when a worker set off radiation alarms on his way into Pennsylvania's Limerick nuclear power plant. His home had a radon dose equivalent to smoking 220 packs of cigarettes a day.

Pennsylvania's copious radon emanates from a formation known as the Reading Prong, which stretches through northwest New Jersey and into New York. Some 250,000 New Jersey houses on the Prong have more than four units of radon (picocuries per liter of air), the level at which the Environmental Protection Agency recom-

mends action, But the National Council on Radiation Protection believes that the EPA overstates the risks of radon in homes, and that only bouseholders with eight or more units should act. Both say that lifetime exposure to their recommended action lev-els gives roughly a 2 percent risk of contracting lung cancer, about the same as the risk of dying on the highway. The difference is important because some 9 million homes are above the four-unit level and only 1 million are above eight. No amount is safe, but focusing on the most severely affected

houses might save more lives.

Radon, produced by the radioactive decay of uranium, is sucked into houses from the soil. The inert gas quickly decays into radioactive products that stick to dust particles and may lodge in the lung. The best remedy seems to be to seal off entry routes and reverse the pressure difference that draws in the gas. But the EPA has had only mixed success with this method.

Radon is clearly a threat to health, far more serious than many other environmental pollutants that command greater attention. Government's first priority should be to develop a cheap, standard method for protecting homes. Its second should be to resolve the dispute about the appropriate action level. No seasible policy can be based on so little knowledge; the lack of a policy leaves the potential for panic.

- THE NEW YORK TIMES.

Too Much of a Welcome

rived in Cameroon on Monday to help renew diplomatic relations, his hosts went to great lengths to create a warm welcome. Some greeted him in Hebrew: The Cameroon Tribune had a front-page headline in huge Hebrew letters, "Mr. Peres, Welcome to Cameroon." The characters were upside down, but the hospitable Cameroonians need not feel a single twinge. The error is only the newest manifestation of a worldwide malady that often afflicts eager hosts.

The sir-or-madam malady, it might be called, after the tale of the Taiwan schoolchildren who learned enough English to give a visiting American this greeting. "We are glad you are here. Thank you very much, Sir or Madam, as the case may be.

People in Washington still wince when they recall the visit of Liberia's President Samuel K. Doe in August 1982. President

Reagan introduced him to reporters as "Chairman Moe." Later in 1982, Secretary of State George Shultz was to visit Bonn, and the U.S. Information Agency issued a brochure heralding, in large type, the arrival of Secretary of State Charles Shultz.

Probably the best known warped welcome was the deliberate work of Dick Tuck, the political prankster. When Richard Nixon ran for governor of California in 1962, Democrats kept asking darkly about his family's financial dealings with Howard Hughes, the reclusive tycoon. When Mr. Nixon toured Los Angeles's Chinatown he was greeted hy a buge sign in Chinese. His party assumed it was a greeting of welcome.

It said, "What about the Hughes loan?" The sir-or-madam moral: Often people try to knock themselves out to be hospita-

ble; sometimes they succeed. -THE NEW YORK TIMES.

Other Comment

Toward Negotiation in Sudan No Sport Without Winners

Last week's decision by the Sudanese government to break off talks with the rebel Sudanese People's Liberation Army has dashed whatever hope remained of a swift conclusion to the civil war in the South. As a result, the unfortunate inhabitants of southern Sudan are likely to bear the full force of the present famine; there is a risk of further instability, given that the present government came to power last May on a pledge to end the civil war, and any chance of economic recovery has been postponed indefinitely. The logical course for the Sudanese government now would be to resume negotiations as soon as possible. But, quite apart from the usual Sudanese preference for doing nothing, the prime minister. Sadek el-Mahdi, is swayed by concern for

his own position in Khartoum, where feeling is running strongly against the rebels.

It is clearly in the interests of the West that the new Sudanese government should strengthen its fragile pro-Western democracy and achieve stability. [British belp with military training can] strengthen the Suda-nese government's hand in forging what must, in the end, be a negotiated solution.

- The Times (London)

The challenge of American football, with all its bype, its muscle-flexing and even its pompon girls, is nothing compared to the threats British sport faces on the home front. While English fontball is again being battered by hooligans, English cricket is getting it in the neck on the school ground.

The condition of English school cricket at once saddens and astounds. In state schools a campaign has been launched to kill competitive sport. The "playing fields of Eton" are not to be replaced by the sports grounds of the country's state-run comprehensive schools; they are to be abandoned altogether. Competitive games (you know, the ones which not only build empires but also found industries) are to be abolished in the name of the vague concepts

of "free expression" and "self-worth." A physical education program which re-jects the notion of "winners" and "losers" will yield no bumper crop of sporting achievers. The British will no doubt sort this problem out. But we suspect that noncompetitive sport is about as viable as noncompetitive industry. Whatever else it may be, it certainly isn't cricket.

- The Japan Times (Tokyo).

OPINION

Soviet Economic Overtures: Dilemma for the West

By Hobart Rowen

WASHINGTON — Where is the good old Soviet Union of the pre-Gorbachev era that everyone could enjoy hating? In rapid fire order recently, the Soviets not only were offering unilateral test bans on atomic weapons, but made a series of commercial, trade and banking overtures to the West.

A new sense of openness has ex-tended even to the release of disarmingly frank data on nuclear design faults that led to the disastrous accident at Chernobyl.

Perhaps the most dramatic reversal of Soviet form came when the Russians a few weeks ago settled a British claim on defaulted Imperial bonds issued during the Bolshevik revolution. (This was necessary to allow the Soviet Union to join the capitalist investment banking world by partici-pating in a \$93-million Eurobond underwriting through a Finnish bank.)

Ivan D. Ivanov, deputy director of the Foreign Ministry in charge of foreign economic relations, told a Moscow news conference last week that the Soviet Union now is exploring joint business ventures with the capitalist countries.

And although Mr. Ivanov denied it, sources here say that the Soviet goal is not only eager to join the 92-nation General Agreement on Tariffs and Trade — a desire made known officially the other day - but eventu-ally to join the World Bank and the International Monetary Fund. It is a plunge that Stalin considered, and men rejected at the conference in 1944.

The United States and other major powers in the World Bank and the IMF are skeptical about Soviet membership. Clearly, the establishment of more normal trade and financial relations depends on the success of even more significant talks in the area of arms and political strategy. But Mr. Gorbachev's economic initiatives have the West off balance.

It is easy to chalk up every benign sounding word that comes out of Moscow to mere public relations. But even as public relations, a top international agency official admits, it is pretty good — and there probably is some substance in Mr. Gorbachev's prying and struggling to improve the desperate Soviet economic position and to improve relations with advanced and Third World countries.

For example, the seemingly out-of-character deal on Eurobonds could be a prelude to Moscow issuing its own bonds - something it may have to do to make up for the staggering loss of oil revenue caused by the

PRINCETON, New Jersey — Here is a thought you probably have not heard lately: Government

in the United States is too small.

I do not mean that the 35 percent

of gross national product now spent

by all levels of government in the United States on public purposes is too little in any abstract sense. Such

an assertion would be as fonlish as

earlier pronouncements that ruin-ation would follow once govern-ment spending reached 25 percent

Nor do I mean that all govern-

ment spending is of great social value. No doubt billions of dollars

are wasted in the federal budget

and billions more in state and local

budgets. We would all prefer better

government to bigger government
— if only we knew how to get it.

I emphatically do not mean that government should intrude more

into citizens' daily lives or into the

market economy. Government-as-busybody has never been popular in America, for good reasons. In suggesting that the public sec-tor is too small, I mean something

very specific: that more spending

on some traditional functions of

government would yield benefits to society that exceed the value of the

private goods given up in exchange. Americans enjoy the highest lev-

els of private consumption in the

world yet are repeatedly inconven-

ienced, and sometimes endangered,

by an impoverished public sector. I

submit that this makes little sense.

we wait in lines to be served by an

understaffed government. We wait

at motor vehicle hureaus because

there are not enough clerks. We

want at toll plazas because there are

not enough toll takers. We wait in

One bornely example is the way

of GNP or some such number.

plunge in prices. John P. Hardt and Jean F. Boone, Soviet experts for the Congressional Research Service, estimate that every \$1 drop in the price of oil costs the Soviets \$550 million a year in badly needed cash.

Last week, to help the Organiza-tion of Petroleum Exporting Coun-tries keep prices from plunging back into single digits, the Soviets decided to withhold 100,000 barrels of oil a day from world markets (7 percent of their production). If OPEC can restrain its greed, that is likely to main-tain world oil prices around \$15 a barrel, at least for a while. Ironically, this move is perceived as a benefit to oil producers in the American South-

west, and to Mexico. So far, the Soviets have received only a rude rebuff to their GATT request from the office of the U.S. Trade Representative, which says the closed Soviet economy has virtually Mr. Gorbachev has his hand out now, no tradeable goods to offer the West. He appears to know that he must

That point is hard to rebut. Still, the trade representative's performance was not especially deft. Possibilities for wider contacts between the two superpowers should be en-couraged, not dismissed out of hand. The knee-jerk reaction is to worry about giving too much: If the West helps the Soviet economy, do we not make the enemy too strong?
Hawks and doves will argue this

endlessly. What the West must decide is whether a stronger Soviet economy will make Mikhail Gorbachev's nation more stable and responsible.

Last year's summit meeting and the prospect of further Reagan-Gorbachev talks this year on arms control make it necessary for the Con-gress and the U.S. administration to decide in a definitive way how far to go in heiping to bail the Russians out.

A decision cannot be postponed;
Mr. Gorbachev has his hand out now.

revitalize the Soviet economy, install incentives for better performance and cut down on alcoholism. A critical need is the modernization of Soviet heavy industry. They have got to have better machinery, at the world level," Mr. Hardt said in an interview. "More and more they are bolding managers to foreign standards." But even this pales against the So-

viet need of tying into the computer information revolution. That is prob-ably why the Soviets are fearful of the Strategic Defense Initiative. Whether or not the space-defense program knocks out offensive nuclear weapons, it could spawn huge advances in technology with civilian applications.

The Russians don't have microelectronics or lasers," Mr. Hardt said. Prime Minister Rajiv Gandhi said when he was here that India may have missed the industrial revolution, but can't afford to miss the information revolution. The Russians know they face the same reality."

The Washington Post,

A Lethal Pretense Should Be Dropped

P ARIS — After the brief encounter between Soviet and Israeli diplomats in Helsinki last week, a Soviet spokesman accused Israel of created a new form of political legiti-"a very arrogant interference in the internal affairs of the Soviet Union." This was because Israel expressed its to the power of the people. concern for Jews in the Soviet Union.

iterierence in nal affairs of other countries has been a Soviet specialty for 70 years; it is a little late now to complain when it is reciprocated. Israel's concern for Jews in Russia rests on the particular character of Israel as a Jewish homeland as well as a conventional state.

Religious kinship provides a more plausible basis for concern about what goes on in other countries than the claim Moscow makes, to justify its interference in others' affairs, that it acts on behalf of the revolutionary

working class of the world. The Soviet leaders claim that theirs is not so much a nation as a step forward in history, with a revolutionary mission to everybody else. This is the claim made, with more constructive results, by France after the revo-lution of 1789. The French did their best to provoke new revolutions against the monarchies that were try-

ing to crush the government in Paris. The argument they made was that France's transfer of power to the people (who soon were to transfer it back to Napoleou, but leave that aside)

Suppose 24 people pass through the toll plaza each minute. If this goes on for eight hours, 11.520 people Japanese students. Ironically, the experience delays. If the authorities Japanese remember what Ameri-

could reduce the average waiting cans seem to have forgotten: that time by one minute by hiring two high quality public education was more toll collectors, then 192 hours one of the secrets of America's so-

of private time could be saved by adding 16 more hours of labor to the public payroll. Is that not a tional ills, and some important

the high costs of reducing pollution.

Want bigger sums yet? Consider decaying bridges, tunnels, roads.

London Bridge is in the private sec-

but public-sector bridges are more numerous and less well cared for.

Finally, if you want to think

The writer, n professor of economics at Princeton University, contributed this comment to The Washington Post.

macy that rendered monarchy illegitimate. Kings would have to give way

They were right. Exactly that evenhand, have failed to bear out the Soviet claim to represent the future against the past. By asserting the claim, though, the Soviets have made a fundamental difference to 20th century history, first in 1918, when Bolshevik leaders met German and Austrian officers in the fortress of Brest-Litovsk to negotiate an end to

Russia's part in World War I. Germany was convinced that Russia was incapable of going on with the war and demanded immense territorial concessions. The Soviet delegation, led by Leon Trotsky, refused these, but declared dramatically that Russia unilaterally would stop fighting. Trotsky then appealed to the workers of Germany and Austro-Hungary to support Russia against

their own governments.

In the short run, the move was a failure. German troops advanced and Lenin soon was compelled to sign terms worse than originally offered. In the long run, the demonstration of German ruthlessness hardened public opinion in the West, especially in

about truly staggering sums and the very future of the nation, think about public education. The harsb

truth is that America no longer has

the best-educated populace in the

world -not even close. Illiteracy is

shockingly common in America —

can read and write. American stu-

steps require little public expendi-

ture. But Americans delude them-selves if they think they can sharply

reduce illiteracy or raise the level of

scientific education without devot-

ing more resources to these tasks. That means more spending.

High crime, environmental deg-radation and faltering public edu-

cation seem so much more impor-

tant than long lines at toll booths -

and they are. But all are symptom-

atic of an ideological attachment to starving the public sector. The next time someone tells you

that the United States cannot af-

ford higher literacy, better sewage-

treatment plants and more law en-forcement, think about all the video

cassettes, designer jeans and trashy

America, and prompted Woodrow Wilson to issue his Fourteen Points. The historian John Wheeler-Benactt writes that with Brest-Litovsk, there emerged that new and potent factor in world diplomacy, Bolshevik propaganda; propaganda carried on by the party that formed the governactivities that government professed official ignorance. . . It was on this policy of 'parallel diplomacy,' first used at Brest, that the activities of the Third International were based after

its organization in 1919."

The claim of the Soviet Communist Party to represent the interests of the international working class is maintained to this day, to justify systematic interference in the internal affairs of other countries. "Parallel

diplomacy" remains current practice.
Idealistically inspired, this course has contributed bule to human happiness. It has aggravated civil disorders or civil war in scores of countries, without improving peoples' bves. It has provoked retaliation against the Soviet Union and its allies, from the Allied interventions in support of the White Russians in the civil war to the Bay of Pigs and America's current sponsorship of the "con-tras" fighting the Nicaraguan regime. It has not been a success. The only

important countries where pro-Soviet Communist parties have come to power have been those where Soviet soldiers put them in power. The capitalist nations give not the slightest sign of collapsing under the assault of their laboring classes, groaning to be united with the Soviet motherland. The claims to be socialist made by Third World dictators would have horrified Marx. The class revolution has proven a myth.

Soviet commitment to the ideology of international revolution and the practice of "parallel diplomacy" instigated the Cold War and bears a heavy responsibility for the East-West nuclear confrontation. Until this commitment is abandoned, the people of the Soviet Union will not know peace, nor will they enjoy normal relations with any other country. It is an illusion by which they have condemned themselves to a struggle that is actually a strug-gle against reality, and one to which no end is in sight.

Superpower Ambitions For For Japan?

By Giles Merritt

B RUSSELS — Japan a superpow-er? Can it ever become one? The Japanese may be on their way to taking over as the world's leading industrial power, but is that enough? Japan is an economic colossus, yet it is also a geopolitical dwarf.

Defining Japan's status and its fu-ture place in the world is an urgent problem. The Japanese are beginning to demand that their new economic power be rewarded by trade and investment privilege. Anyone in En-rope or the United States who be-lieves that the best tactic is to ignore such noises from Japan would do well to look back 60 years and think again.

The murmurings of Japan's leading thinkers and political scientists ing thinkers and pointed scientists are both instructive and disturbing. Far from being the nation of biddahle workaholic pacifists the West so fondly imagines, the Japanese are becoming increasingly impatient and aggressive. One of their preoccupations is that soon they will have no above that to take over the economic. choice but to take over the economic leadership of the free world from the United States, and another is that Japan's economic muscle will then entitle it to impose new international trading rules to suit its exporters.

The economic power of the Unit-ed States is dwindling, and the U.S.dominated international economic dominated international economic order is on the verge of collapse," says a leading Japanese economist, Kenkiro Hayashi. "Now, with the world economy at a turning point, is the time for Japan to begin speaking out and taking action to build a new order for the 21st century."

Mr. Hayashi 46 is the Nomura

Mr. Hayashi, 46, is the Nomura Research Institute's director of economic research, and by all accounts his voice represents a highly influen-tial segment of opinion in Tokyo.

"The growing trend toward protec-tionism," Mr. Hayashi writes, "is a sign that world history has reached the end of the chapter that features the United States as the pivotal nation ... We are now in the midst of a major upheaval in the world economy, an upheaval that will continue until the next era's leader appears."
He goes on to say of Japan: "Al-

though it has great potential, its inter-national role and voice are not full developed. Japan's task henceforth & to use its vast net claims to angment its share of foreign assets and liabil-ities alike, contributing to the growth of the world economy.

Another prominent commentator at Nomura, Eguchi Yujiro, put much the same sentiments even more bluntly. "Ten years from now, Japan will have net external assets of \$500 billion, a level far in excess of America's foreign holdings at their peak. Both Britain and the United States created and ran international systems with themselves at the top. Now it is Japan's turn to come up with an inter-national system suited to itself." In truth, the Japanese have done

DO: Good

co (Jurge

VESBURY.

little to groom themselves for any sort of a superpower role. Their interests have remained largely domestic. despite their export successes.

The "sclfish" image Japan projects.

— in part through its relatively local levels of foreign aid — may be und served. Yet in recent years, Western ers have not been alone in complaining about Japanese behavior. Tokyo has been admonished by Southeast Asian leaders like Prime Minister Mahathir bin Mohamad of Malaysia. who advised the Japanese not to be just "takers" in their economic relationship with ASEAN countries.

The central question is whether Japan can be a global power without renouncing the anti-militarism it as-sumed after World War II. Its defense budget for 1986, at a modest \$21 billion, remains at around 1 per-cent of GNP; Japan continues for most purposes to be defenseless. against outside aggressors.

The Japanese government has published a new defense review that selfas significant new strategic goals the ability by 1990 to defend its sea lanes and to provide its own air defenses. This shift to a more active military role was summed up nicely by Professor Fuji Kamiya, an expert on U.S.-Japanese relations: "Since the end of World War II," he noted, "Japan has followed a policy based on the conviction that since the country couldn't play the role of fearsome warrior adopted by Russia and. America, the only course open to it was to walk softly and devote itself to building prosperity through com-merce. At the end of the war that was a wise policy decision, but now, 40 years later, Japan can no longer con-tinue as a full-time merchant. The world today will not permit it."
Whether the world will welcome

Japanese rearmament, however, is ! quite another thing. International Herald Tribune

International Herald Tribune.

Pennsylvania, near Pittsburgh, con-sequent upon an alarm of fire. [The final toll in the Cannonsburg fire was later placed at twenty-nine persons killed and 60 seriously injured.] An audience estimated at 900 was watching a moving picture show when a film suddenly flared up. "Fire! Fire!" shouted a man in a frenzy. Panic seized the andience. Men, women and children with terror on their faces rushed for the exits, and an unforgettable scene of horror ensued. The disaster was wholly needless. There was no fire, as the operator of the picture machine succeeded in extinguishing the flames in his asbes-tos booth before the audience knew anything was wrong

fending Irun from the crest of Puents Ridge desperately threw back a concerted attack by insurgents [on Aug. 28] and apparently upset the carefully laid plans of Fascist commanders who had scheduled the fall of Iron by the end of the week. A combined drive of Foreign Legionnaires, Fascists, Carlists, Moroccans and regulars was repulsed by the deadly acceracy of Red artillery, said to be commanded by a former French officer. An insurgent mass captured the Rio Tinto mines held since the outbreak of the revolution by Popular, insurrectionist garrison. Governmentsources reported a typhus epidemic in the city and said children werethe principal sufferers.

OPINION

A Rare 'Porgy and Bess,' Ambition: For Japan By Giles Merrin Glyndebourne festival's "Porgy and Glyndebourne festival's "Porgy and asse" ended, the entire cast was crying. Care of the act of the director, Tree Num, and the conductor, Simon Radrew in the director of the director, Tree Num, and the conductor, Simon Radrew in the director of the unit of the unit

The singers were that caught up in the tragic story and George Gershwin's expression of it in music. But more than that, they must have known they were part of a rare experience: a production that redeems an artistic vision, rescuing it from doubts, bringing it to life.
"Porgy and Bess" has had its doubters

from the beginning, in 1935. There were wonderful songs, yes. But did they amount to more than a collection of times by the most gifted of Broadway song writers? Was it an opera?

Then there were doubts about its racial character. The picture of life in

In the many productions over the years, something ahvays was lacking. Those doubts dissolved minutes after the curtain rose at Glyndebourne.

Catfish Row - of blacks who talk in 'dat's" and "dem's" and say "Yes, boss" to white South Carolina policemen was said to be condescending. And could a Jew from New York really capture the qualities of black music?

Gershwin undertook the challenges deliberately. He read DuBose Hey-ward's novel "Porgy" in 1926 and decid-ed then that he wanted to write an opera based on it. When the way was finally clear, in 1933, he spent months on the South Carolina coast absorbing the rhythms of speech and song. The result undeniably included much

beauty and emotion. I always cry at the end, when Bess has been tempted to New York and the crippled Porgy goes after her in his goat cart: "Oh Lord, ·I'm on my way. I'm on my way to a heavenly land." But in the many productions over the years there was al-ways something lacking: a wholeness, a unity of ideas and music that characterizes opera at its best.

All those doubts dissolved within minutes after the curtain rose at Glyndebourne. Shapes took form in darkness, fish Row. When Clara sang "Summerfish Row. When C condescension here. One saw that Gershwin and his collaborators, his brother Ira and DaBose Heyward, identified with their characters. These were not stereotypes, quaint Southern blacks, but individuals struggling with destiny. in oppressive circumstances.

culture of "Porgy and Bess" the universals and the tension of great art.

and the second of the second o

Willard White, who played Porgy, gave the part an extraordinary — a crucial - dignity. Before our eyes a pathetic beggar grew into a tragic hero. There was no goat cart. Porgy, one leg borribly twisted, walked with two home-made canes. At the end, as he set out on the impossible journey to New York, he threw first one, then the other away.

The tears shed in this audience were not just sentimental ones for Porgy. Or so I thought, trying to understand what made it so moving an occasion.

There was the sense of Gershwin's dream coming true. He had written an opera, and what more might be have done if he had not died just two years later, at the age of 38? And another vision was justified; that

of Glyndebourne itself. In 1934 John Christic started what might have been a folly, an opera festival in the English countryside, with audiences in dinner dress. German refugees helped to bring it artistic distinction at the beginning, and over the years it has attracted great conductors, directors and performers.

Now, with this production, Glynde-bourne had reached across cultures to produce what one English critic called "one of the most stirring events of an opera-going lifetime." Or perhaps, rather, it had shown that cultural and racial differences need not matter so much. Something like that hope was part of the emotion of the evening.

It may be that only Glyndebourne

could devote the time and attention that would create a "Porgy and Bess" of such integrity. Its power was internal, not flashy. In the small opera house at Glyndebourne, scating 831, it was almost unbearably concentrated.

Economic realities rule out doing this production in a larger theater or opera house. I hope a way will be found to apture its quality on television.

The first Porgy was Todd Duncan. He described how he first heard the score -George and Ira Gershwin singing it to him in "their awful, rotten, bad voices." He resisted, then was overcome. When "they finally finished, with Tin on My Way, I was crying. I was weeping." The New York Times.

LETTERS TO THE EDITOR

For Gorbachev, a Put-Up or Shut-Up Proposition

I am surprised at Mr. Wicker's naïveté regarding Mikhail Gorbachev's "peace" overtures. If Mr. Gorbachev is extending for the fourth time his unilateral test moratorium, it is simply to appease So-viet public opinion after the catastrophe at Chernobyl. I suggest that Mr. Wicker and certain members of the House of Representatives read carefully Mr. Gorbachev's speeches delivered July 28 in Vladivostok. He stated clearly that "we must strengthen our defense, which will require considerable resources and efforts." There is no mention of reducing the arms bill, which eats up 16 percent of

Soviet oational resources, If Mr. Gorbachev is really interested in peace, let him confirm that he is willing to: a) organize free elections in the East-bloc countries under United Nations supervision, according to the terms of Yalta; b) return all territories taken before World War II and afterward to Finland, Romania, Czechoslovakia, Poland and Germany, according to the UN Charter; c) restore the independence of Lithuania, Latvia and Estonia; c) immediately withdraw all Soviet

to see that President Reagan is keeping a sintelligence reports anymore? I have in

R.E. BERCHTEN. Yverdon, Switzerland.

'Low-Intensity Warfare' Regarding the Insights column, "Why the Balance of Power Favors Israel" (Aug. 8) by Charles Babcock:

Does anyone think that the information contained in this article comes as a surprise to Israel's Arab neighbors or to the Soviets? Both became reconciled long ago to the certainty that, even should they make gams in an arms race with Israel, the U.S. government, under that influence described in the adjoining article ("Pro-Israelis Force Congressmen to Remember 'the Percy Factor'") will immediately restore the "balance."

They are therefore delighted to see both ourselves and "our most valuable ally in the Middle East," at great expense and increasing strains on the relations between us, continue to prepare for the kind of war that is not going to be fought. Meanwhile, they are increasing their capabilities for the sort of "lowintensity warfare" designed to provoke troops from Afghanistan.

Then and only then can we begin to believe that Mr. Gorbachev really desires peace. In the meantime, I am glad

man, c) immediately withdraw all Soviet intensity warrare designed to provide reactions that will give us even more reactions that will give us even more included that the periority even more irrelevant than it is.

Doesn't anyone in Washington read

mind those Soviet strategy papers, "think pieces" and other documents that Kremlin officials pass among them-selves and which air force intelligence and other parts of Washington's intelligence community have procured, translated into English, and made available through government bookstores.

These, along with what we have arned from recent defectors, indicate Soviet strategists' pleasure at how we are playing into their hands, and some bewilderment at our failure to realize that this is what we are doing.

Many Unhappy Returns

Regarding the report "Americans Abroad Are Said to Evade up to \$2 Billion in Taxes" (Aug. 15): The article by James L. Rowe failed to

mention two crucial facts: First, the United States is virtually the only country to tax nonresident citizens. though these citizens use no U.S. facilities apart from trips to the embassy once

in a great while. And second, Americans abroad are taxed without being represented as such in Congress. Surely this basic wrong — over which the war for independence was fought - is sufficient reason for many of us not to file a tax return. P.S. I have filed for 26 years.

- HANS WYNBERG. Groningen, The Netherlands.

A One-Woman Jury Names Those Most Likely to Impede

By Ellen Goodman

BOSTON — Every year, in memory of my historic foremothers, I celebrate Aug. 26, the anniversary of the passage of women's suffrage, by recognizing those who have done their utmost in the previous 12 months to slow the

progress of women.
This annual event, known as the Equal Rites Award ceremony, stirs butterflies in the stomachs of finalists, and competitive fever among those who

MEANWHILE

push their favorite candidates. Once again our one-woman jury had the delicious task of sifting through dozens of entries to find the gems.

Now, the envelopes please.
The highest prize, The Ms-Anthropic
Man of the Year Award, was won easily this year by a real gem of a gent, "Dia-mond Don" Regan. It was Diamond Don who said at the Geneva summit meeting last fall that women are "not going to understand throw weights."

He then divested himself of all good sense, explaining our South African po-licy this way: "Are the women of Ameri-ca prepared to give up all their jewelry?" To Diamond Don we send one charm a Minuteman-2 missile whose throw weight has been calculated at 3,628,000 carats - attached to a neck chain to wear at the White House.

Ferdinand Marcos, another leading contender, will have to settle for The Chivalrous Chanvinist Award. It was Mr. Marcos who said in December that he was "embarrassed" to be running against a woman. "It's better if it's a man. If it's a woman it might lead to something bad." Like defeat. Mr. Marcos's award is not accompanied by a prize because he already has Imelda.

Who could ask for anything more? The Ms-Match Maker Award, an attractive panic button with shocking voltage, goes to Newsweek magazine for its doomsday cover story, noting that a single woman over 40 was more likely to get killed by a terrorist than to get mar-ried. We include a biological clock,

which ticks suspiciously.
While we are on the subject, the Maternal Uoderstatement of the Year Award must go to the mother of Anne Marie Murphy, the pregnant Dublin woman who was put on a plane with a special going-away gift —a bomb — by her alleged terrorist beau, Nezar Hindawi, Said Mom, "I do not think very much of this boyfriend." To this fussy Mom we send the Newsweek cover suitable for framing.

The Raping Hormonal Imbalance Award, which often has gone to male members of the medical establishment, this year goes to Dr. Richard Restak. The neurologist has come up with a calculate that the members of the membe solution to the medical-care crisis: Encourage more women to go into medi-

cine because they are "cheaper" and "compliant." To Dr. Restak we send a copy of his own book, "The Brain," and

humbly suggest that he use it.

The Fatherhood Is A Snap Award goes to Bob Edwards, of Escondido, California, who was not aware of his wife's most recent pregnancy or delivery. We were in the living room playing with the toys.... She was in the bath-room having a baby. I wonder, how did I miss that?" said Poppa Bob.

The Reverse Discrimination Prize, a vehicle that only goes backwards, is awarded to Gerard D'Amico, a candidate for lieutenant governor of Massa-chusetts. Mr. D'Amico is running against Evelyn Murphy in a state that has never elected a Democratic woman to statewide office. But, Mr. D'Amico says, he hopes people will vote for him

despite his sex.
Even in this quiescent year, we found a group of protesters for the Dubious Equality Award. They are seven women who marched topless in Rochester, New York, to protest a state law that allows men but not women to take off their shirts. To the Rochester Seven we send a T-shirt commemorating the event. In fact we send seven T-shirts.

As another well-dressed special, we have awarded a Designer Cancer Prize to Yves Saint Laurent, who put his name and image on Ritz cigarettes to woo women into taking their equal place in the cancer wards. To Mr. Saint Laurent we send a nicely stitched copy of the statistics that show that oearly twice as many college women as men smoke cigarettes every day.

Another award heading overseas is the International Backlash. Wrapped oeatly in a chador, it goes to the president of Iran, who refused to attend a Zimbabwe dinner in his honor because there were women, including cabinet ministers, at the table.

The Hometown Ayatollah Prize goes to Bishop Authony Bevilacqua of Pitts-burgh. He decreed that women could not have their feet washed on Holy Thursday because no women had their feet washed at the Last Supper. The G-String for Gratuitous Sex,

fought after by so many rock stars over the years, goes to a Los Angeles group heavy on the metal and light on the mental: Motley Crue. According to the record company's bio, "When asked to name an incident that typifies the band, they point to the night in Dallas that a doctor lined them up and gave them double doses of pencillin."

Finally, the Dancing in the Dark Ages Prize goes to State Senator John De-Camp of Nebraska where, for the first time, the race for governor is between two women. Mr. DeCamp, who called it a "state prom queen contest," will be sent a dance card. Blank.

Extremist activity has declined in the French Basque country. A self-styled "anti-terrorist organization" known as GAL, dedicated to carrying out reprisals in France for attacks in Spain, appears to have suspended activities.

The origins of GAL, which appeared on the scene three years ago with attacks on Basque refugees in France, remain mysterious. Some evidence suggests that the group was connected to elements in the Spanish police who were frustrated by what they took as a lack of French cooperation in combating Basque extremist activity.

Support for the new anti-terrorist drive has come from several Basque mayors in France who regarded the exiles as unwelcome troublemakers.

"There are not many French Basques who are in favor of independence," said Mayor Michel Poulou of Ciboure, the town next to Saint-Jean-de-Luz. "I don't think that these exiles should be that France would be considered allowed to stage demonstrations

In Rocketry, Too, It's 'Made in Japan'

By John Burgess

Washington Past Service

TOKYO — Against great clouds of white smoke, a slender rocket lifted off from Japan's Tanega Island space center on Aug. 13, offering new evidence that Japan could become a major player in the commercial launching of satellites in the 1990s.

Japanese engineers drank sake toasts. Newspapers displayed photos of the 130-foot (39.5-meter) rocket, the first in a series called the H-1. Celebration was in order because key compo-nents in the rocket were designed and produced in Japan, replacing U.S.-model parts in previ-

ous rockets.

Few people expect the H-1, a comparatively small rocket, to figure in commercial launches. But its success has brought Japan closer to development of the much larger, all-Japanese H-2. scheduled for test launch in the spring of

If it performs as intended, said Merl Peters, a representative in Tokyo of McDonnell Douglas Corp., the H-2 could be "world-class competi-

The H-2 is still on the drawing boards, and the Japanese have made no formal decision to open their space program to the world. Their program, in any case, remains tiny compared with that of the United States. Research and development spending last fiscal year equaled only about 0.9 percent of that by the U.S. National Aeronautics and Space Administra-

Western Europe caused by the Challenger disaster and a string of failures in unmanned rockets has put a new cast on Japan's efforts in this field. So has President Ronald Reagan's decision to get the shuttle program out of the commercial launch business.

In industry and government in Tokyo, there is a feeling that the H-1's initial success has put Japan on the road to ending its dependency on U.S. rocket technology. Although Japan can never hope to compete with the United States and Europe across the board, officials suggest, it might do so in selected niches.

For the present, Japan is also working to hone skills in building satellites. It has agreed to contribute a module of the U.S. space station that is scheduled for assembly in orbit in the 1990s. Japanese engineers are designing their own version of a space shuttle. They have gotten as far as test-gliding a scale model but

there is no sign of when, if ever, it will be built. Japan's rocket program dates to the 1955 experimental launch of a pencil-sized model. Since then, Japan has followed a development strategy that it has used successfully in other fields: importing licensed technology to learn the basics in difficult areas, then branching out on its own.

Japanese rockets have launched 17 satellites since 1976. There have been no launch-pad explosions, although twice rockets have mis-

In the 1960s, Japan developed the solid-fuel inertial system.

Still, the disarray in the United States and M series of rockets, capable of lifting light payloads into low orbits. In the 1970s, under ense from McDonnell Douglas, it manufactured an N series based on liquid fuel, essentially a Japanese version of the Delta booster.

The H-1 goes an important step further. The first stage is standard Delta, but the second is Japanese designed and produced, containing a liquid-fueled engine with a thrust of 10 tons. Mitsubishi Heavy Industries Ltd. and Ishikawajima-Harima Heavy Industries Co. were the main contractors.

Engines of this type, powered by liquid oxy-gen and liquid hydrogen, are hard to build, in part because the two fuels are stored at different super-cold temperatures. But their development is crucial to serious rocketry, because they can be throttled on and off during flight. Solidfuel rockets burn only once:

McDonnell Douglas is sufficiently impressed with the new engine to have suggested infor-mally to the Japanese that it might want to use the engine or parts of it in a line of booster rockets the company is considering building now that the shuttle program has ceased com-

For on-board course monitoring, previous Japanese rockets used inertial guidance systems provided on a "black box" basis by General Dynamics Corp. That meant Japanese engineers were not allowed to open and examine the devices. The H-1, however, has a Japanese

SOUTHEAST ASIA AREA SALES MANAGER

NELLCOR, a United States based leader in advanced technology, non-invasive medical monitors for critical care applications is expanding internationally.

ment sales to join our international sales management team as Southeast Asia Area Manager. Principal sales efforts will be directed in Singapore, Australia, New Zealand, Taiwan, Hong Kong, Indonesia and the Philip-pines. Preferred location for the base of operations is Singapore, although others will be considered. The successful candidate will have 6-10 years of inter-

national medical sales or sales management experi-ence, preferably in medical capital equipment for hospital use. A coffege degree in business, science or a related field is desirable, and a history of successful career progression is required. Oral and written flu-ency in English is also required. Duties will include coordination of sales distributors and representatives in each country as well as some direct sales.

NELLCOR offers competitive salaries and commissions and the opportunity for its sales managers to develop strong business units within the international organization. For immediate consideration, send a resume or curriculum vitae to: NELLCOR, International Employment, 25495 Whitesell Street, Ad #08-08, Hayward, California, USA 94545.

Harvard Sets Anesthesia Standards

CHICAGO (AP) — To improve patient care and prevent operating-room deaths, doctors developed Harvard University Medical School's

Of the 20 million patients who receive anesthesia each year during

operations in the United States, an estimated 2,000 or more people die of

causes "primarily attributable to anesthesia," the report stated. But most of these deaths "are thought to be preventable," according to the report in

"Physicians traditionally have resisted standards of practice that prescribe specific details of their day-to-day conduct of medical care," the

report said. "Only vague or general standards of practice exist in American medicine." The report contends, however, that by adopting

specific, required standards, doctors nationwide could improve their care

for patients, and reduce the spiraling number of malpractice cases against

Mussel Glue Could Aid Bone Repairs

WOODS HOLE, Massachusetts (AP) — The adhesive that holds mussels to rocks in the face of battering by waves and ocean currents may aid the repair of knee and hip injuries, scientists say.

The mussel glue enhances the ability of soft bone cells to grow on a metal alloy used to make artificial hip joints, suggesting that it could be used to strengthen the bond between bones and metal replacement parts, said Dr. John Fulkerson, an orthopedic surgeon from the University of Connecticut School of Medicine.

Among the advantages of the give is that it sets underwater, even in the

corrosive environment of saltwater, which is similar to the environment in

the human body. The gine also can be used to attach soft tissue to hard

tissue, and thus may be useful for re-attaching tendons to bones, said Michael Kurek of BioPolymers of Farmington, Connecticut, which holds

GLAND, Switzerland — The birth of a giant panda on Ang. 10 at a cooperative center run by China and the World Wildlife Fund is a major

step in efforts to save the species from extinction, officials of the

They said that the panda cub, which weighed 3.5 ounces (105 grams) at birth in the facility in China, was born to Li Li, a female 15 to 18 years old

weighing 237 pounds (107 kilograms), and Quan Quan, a male 6½ to 7 years old weighing 198 pounds.

Smoker Dad Risks Underweight Baby

LONDON (AP) — Researchers say a father who smokes during his wife's pregnancy risks his baby's weight being reduced at birth.

The weight loss would be nearly 11 omnes (330 grams) for a newborn whose mother and father both smoked a pack of cigarettes a day during the pregnancy, according to a study of statistics gathered in Denmark.

The findings were recently published in The Lancet, the British medical journal. Researchers at the Gentofte University Rospital in Medical Denmark.

Hellerup, Denmark, wrote that 500 Danish women were interviewed

Agence France-Presse reported. The index had lost almost 30 points on Tues-

The Hong Kong Index put on 11.12 points to

Dr. Madey, now a physicist at Stanford University, reasoned that, if powerful magnetic fields on Earth could be applied to a stream of billions of speeding electrons, laser light would result. "Each time the electron is deflected it emits a burst of radiation," noted Dr. Madey's FEL patent. "The combination of the individual bursts yields a beam."

Dr. Madey tried his novel idea on electron accelerators at Stanford University, an international center for Dr. Charles A. Brau, an FEL pioneer at the Los such big machines. There, an accelerator boosted Alamos National Laboratory in New Mexico, said electrons to near the speed of light and fired them into a magnetic "wiggler," where they were forced to emit light, creating a laser beam.

An electron whose path is bent by a magnetic field will

emit a photon or particle of light. Such emissions have

been observed in electrons speeding through outer

space near the magnetic fields of supernovae.

What made Dr. Madey's device powerful and diflerent was that it dealt exclusively with electrons, in contrast to conventional lasers which work by lifting a "significant" number of electrons into orbits high about the nuclei. When these electrons subsequently fall or are pushed back toward the nuclei, they produce a rush of photons that combine to produce a laser

absolutely incredible power you need for the laser propulsion of rocket ships."

"Over the next decade, it's going to have a profound impact on basic science and application engineering," added Dr. John J. M. Madey, a physicist at Stanford The problem from the standpoint of efficiency is twofold: Not all electrons are raised to higher orbits and raising them requires more energy than is

Dr. Madey's device manipulated electrons directly. Though seductive, the idea did not create an immediate sensation. As late as 1982, Dr. John D. Rather, a physicist and laser consultant, was telling Congress that "it's a national travesty that free-electron lasers are not being pursued on a crash basis."

Lasers work by creating quick movements among electrons, tiny particles that normally orbit around the primary reason it's been slow developing is that it's big and expensive."

Today, all that is starting to change, the device radiation that are coherent, that is, their light waves having become the darling of laser experimenters and are all in step with one another. Incredibly concentration in some cases shrinking physically, although even the ed, laser light can bounce off the moon or bore smallest units still cost a few million dollars.

Medical researchers at the Massachusetts General In contrast to regular lasers, FELs use electrons that Hospital and Stanford University, among other institutions, are exploring the use of FELs for surgery. Because of its unique control of electrons, an FEL can create laser bursts so strong and short that they literally blow off a layer of cells without heating structures underneath, a phenomena with many potential uses in medicine.

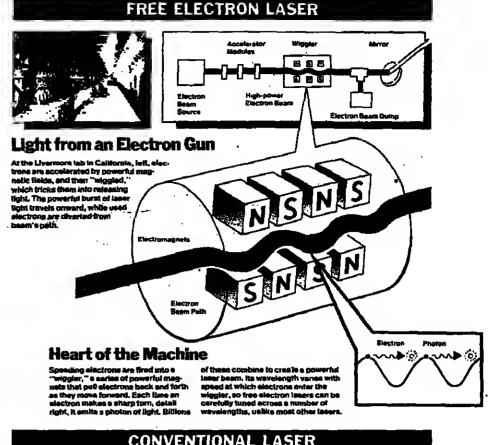

"We are delighted to participate in what we expect will be a new frontier," said Dr. J. Robert Buchanan, general director of the Massachusetts General

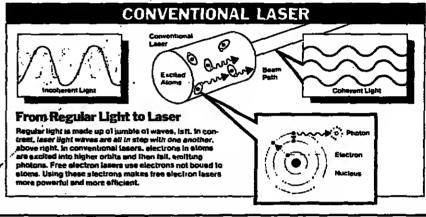

At AT&T Bell Laboratories, where the transistor was invented, researchers are building an FEL for use which runs research for President Ronald Reagan's in studying how electrons move in semiconductive SDI antimissile plan, to embark on a \$1-billion FEL materials, which are the basis of transistors and comtest facility in the New Mexico desert. When finished puter "chips." Since FELs are tuneable, their light can in the early 1000s, the city of the control of the c in the early 1990s, the site, 2 miles wide and 10 miles be used to selectively excite different types of semiconlong, will be staffed by hundreds of technicians. Just ductors, allowing a host of insights.

For materials research in general, the FEL is seen as a boon, especially as it reaches into the extreme ultraviolet. "With conventional lasers, all we can see right now in even modest-sized atoms is the outer electrons," said Dr. Brau of Los Alamos. "New wavelengths made available by the FEL will allow us to see deeper into the atoms and to study them in more

application. We got our first data in 1976 and had the FELs are envisioned for use in large-scale photowhich they want a freeze-dried comes cut. This altered comes then is

Like many inventions, the FFL was at first viewed chemistry, the laser light setting off chemical reactions as a laboratory curiosity.

FELs might one day be used to shoot down enemy

"Two years ago, there were a very, very few small laboratory versions of these, and mostly they were ideas on paper," Lieutenant General James A. Abra- the two laboratories is how electrons are accelerated hamson, director of the Strategic Defense Initiative rather than how they are wiggled to produce laser Organization, said recently. "Now, we have already light.

At Los Alamos, Dr. Brau said that any FEL, no operating at 42 percent, at the Lawrence Livermore Laboratory. And, as a result of that, we're ready to skip steps. We're ready to skip the intermediate steps and move directly to much larger versions."

In theory, free-electron lasers have great advantages as weapons because their wavelengths can be adjusted so as to best pass through the atmosphere. Generated on Earth, the beam would be bounced off a series of Union. Some scientists have said that devising mirrors of such accuracy and protecting them from attack may be an insurmountable problem.

nia and the Los Alamos lab in New Mexico are racing percent."

looked at," said Dr. Madey, "commercial chemical systhesis, both organic and inorganic, pharmaceuticals, and even high-purity semiconductors." to perfect a giant new type of FEL, the winning design to be built in the New Mexican desert. Both laboratories are federal facilities devoted primarily to the design of nuclear weapons.
"I'd claim our approach is less risky," said Dr.

William A. Barletta, a beam weapons official at the Livermore lab. The main difference in the designs of

matter what its design, had advantages over other large lasers for antimissic defenses. "The main obstacle is getting rid of waste heat," he said, "But in FELs. with the electrons moving at nearly the speed of light, you dump them and the heat as well."

Looking further into the future, some researchers foresee a host of new roles for the FEL. "It will change the world as much as the invention

orbiting mirrors toward missles over the Soviet of electricity," said Dr. Rather. "It will be used for Union. Some scientists have said that devising mirrors power beaming, for propulsion of rocket ships, for fusion energy. It's the efficiency that makes it so attractive. In theory, the efficiency could be 100 per-Currently, the Lawrence Livermore lab in Califor- cent. Practically, it's going to be somewhere around 70

WALL STREET WATCH

METEK . The Third Utility: Water Attracts Analysts' Attention

By VARTANIG G. VARTAN New York Times Service

EW YORK — It is no secret that electric and telephone utilities have fared handsomely in a stock market environment partial to companies with rising dividends. But another regulated industry — the water utilities — has turned in a stellar performance amid little faufare. strings—as turned in a stellar performance and note lathage.

Shares of American Water Works Co. traded at a record price of \$44.50 Thesday on the New York Stock Exchange, before closing at \$43.50, down 25 cents. Adjusted for a two-for-one stock split in early 1985, its shares—and dividends—have been

climbing steadily for a number of years. The stock sold as low as \$13.50 in 1984 and earlier changed hands at \$6.25 in American Water 1982. It has outdistanced Works has done so

many blue chips over the course of the bull market. Based in Wilmington, Delaware, American Water Works ranks as the giant in a relatively small industry. This atility holding company, according to the Standard & Poor's Corp., constitutes the largest

well, in fact, that advisers now are divided on its prospects.

group of privately owned wa-terworks systems in the United States, serving more than 500 communities in 20 states. The stock has done so well, in fact, that analysts now are divided on its prospects. One who remains unabashedly bullish is Mark Matheson of Raymond, James & Associates Inc., a brokerage firm in St. Petersburg, Florida. Early this mouth, he compiled a report on the company when the stock was selling in the high

30s and his advice was "buy." "I am still recommending the stock and I think it has the potential of topping out at a price of around 50 within the next three months," he said Tuesday. "At that point, I would place a 'hold' label on the shares."

"This is a imique growth stock and not a stodgy atility," Mr. Matheson added. "From 1979 through 1985 the company showed a compounded annual growth rate of 17.7 percent."

UT Milton Schlein of the Value Line Investment Survey regards the shares only as an "average" performer for the next 6 to 12 months. In mid-July, when the stock was selling at 33, the investment advisory service considered

it to have above average market potential.

"At this point, I think that investors in general are better off owning electric attility issues, where the yields are higher," Mr. Schlein said. "I believe the premiums on water utility stocks have gotten too excessive."

R. Thomas Sour of Gruntal & Co. said that, in view of the upward price momentum of most water utility stocks recently, "this could be a time to sell into strength."

American Water Works yields about 2.6 percent. On a fully diluted basis, the company earned \$3.01 a share last year. Mr. Schlein estimates profits at \$3.70 a share in 1986, Mr. Matheson is projecting earnings at \$3.75 a share for this year and at \$4.25 in

In January, directors of American Water Works raised the annual dividend to \$1.12 a share from \$1. Mr. Matheson said that management's stated goal calls for a 12-percent increase in dividends each year.

He also said he preferred American Water Works to the other two water utilities listed on the New York Stock Exchange. These are United Water Resources Inc. and Hydraulic Co. Both stocks have shown good price gains since last year. There are, in addition, a number of water utilities whose shares trade over-the-

Sir Adrian Cadbury, the chairman, with some of the products manufactured by Cadbury Schweppes.

Soft Drinks Giving Cadbury New Sparkle

LONDON - For generations, it has been favorite axiom of the Cadbury family: There's one product that sells in good times and bad - a bar of chocolate.

But these days it is the soft-drink business of Cadbury Schweppes PLC, the British con-fectionary and beverage company based here, that is giving the company whatever sparkle it

Last spring the company bought the beverage operations of Canada Dry and Sunkist from RJR Nabisco for \$230 million. Now Cadbury has acquired a 30-percent stake in Dr Pepper Co. as a member of an investment group that is paying \$416 million. "This is an opportunity to get a foothold in

another segment of the drinks market," said Hugh R. Collum, Cadbury's finance director. He estimated that its recent purchases would give Cadbury about 8 percent, what he called "a respectable share," of the North American soft-drink market.

This would put it in third place, but far behind the leader, Coca-Cola Co., and No. 2 Pepsico Inc. Sales in the U.S. soft-drink market amounted to \$25.5 billion last year, according to Beverage Digest, an industry

If its soft-drink business is sparkling, that is particularly welcome to Cadbury Schweppes Inc., the company's North American operation. Chocolate, the traditional pillar of the company's business, last year proved to be Cadbury's downfall in the North American market, which accounted for one-quarter of its profits in 1984.

In the year ended December 1985, prob-

lems in the company's North American confectionary operations led to a 33-percent drop in total corporate pretax profit, to \$120.9 million. Sales fell 7.5 percent, to \$2.43

The problems also led briefly to a flurry of takeover rumors in London's financial dis-trict, but a bidder has yet to emerge, and analysts now are more encouraged by the company's new forays into soft drinks,
"We can see a good future for them," said
David P. Lang, a food-industry analyst at
Henderson Crosthwaite, which is predicting a pretax profit of about \$180 million for Cadbury this year. "We are comfortable with what they are doing," he added.
It was in 1984 that Cadbury, encouraged

by steady progress in North America, decid-ed to make investment there a top priority. The hope was to double Cadbury's share of the confectionary market from the 8 percent that it attained with the 1978 purchase of Peter Paul, makers of Almond Joy, and make it a clear third behind the giants, Mars Inc. and Hersbey Chocolate Co.

But Cadbury badly misjudged the situa-tion. "It's the only part of the business which went wrong, but it went badly wrong," said Leo D. Ellery, the company's investor relations director.

The company failed to develop consumer demand, instead concentrating on pushing more chocolate onto retailers by giving incentives to food brokers. Chocolate bars piled up, and eventually Cadbury slashed its inven-

tory by one-third.
"We were relying on the pressure of stock in trade to sell goods," said Sir Adrian Cadbury, the chairman and the third generation of Cadburys at the company, "and too little on a strategy which looked to the consumer." For the fall year of 1985, Cadbury

Schweppes Inc. reported a pretax loss of \$7.3 See CADBURY, Page 13

U.S. Efficiency Fell at Rate of 0.5% in Quarter

WASHINGTON - U.S. efficiency in producing goods and ser-vices declined in the second quarter for the first time since the depths of the 1981-82 recession, the government reported Wednesday.

The Labor Department said the

productivity of U.S. workers slipped 0.5 percent at an annual rate in the quarter, pulled back by a 0.3-percent decline in output paired with a 0.2-percent increase in the number of hours worked.

That pairing meant that U.S. workers were working longer hours Using preliminary data, the bu-

reau last month had calculated that nonfarm business productivity increased 1.7 percent in the April-to-June quarter.

However, that was before the Commerce Department reported last week that the nation's gross national product, the broadest measure of economic health, rose at a weak annual rate of only 0.6

percent in the period. Productivity, defined as output per bour, declined at a 3.5-percent annual rate in the fourth quarter of last year but rebounded at a 4.3percent rate in the first quarter of this year.

Productivity, which advanced by 0.5 percent in 1985, has gained just 0.6 percent since the spring quarter of last year.

The only bright spot in Wednes-day's report was a 2.2-percent rate of increase in manufacturing productivity, but the increase was the result of a 3.4-percent decline in work hours paired with a smaller 3-percent drop in output.

It was the first time that both manufacturing output and hours have declined since the fourth quarter of 1982, the tail end of the last recession.

Productivity in the durable goods, or heavy manufacturing sector, declined 0.3 percent as output fell back 4.9 percent in the face of a 4.6-percent rate of decline in work hours, the bureau said.

Productivity in nondurable manufacturing, on the other hand, rose at a 6.3-percent annual rate as out-

put rose 4.7 percent while work hours declined 1.5 percent, it said. If productivity in the erratic farm sector is also considered, total business productivity fell 0.3 percent at an annual rate in the second quarter following a 2.5-percent increase in the first quarter.

Hourly compensation increased 2.2 percent during the April-June

much it costs them to provide

phone lines. The baseline commis-

period but rose 3.9 percent when a drop in the consumer price index is figured in. Unit labor costs increased 2.8 percent. The government's attempt to measure the effectiveness of man-

agement and workers, the efficiency of supply systems and the effects of modernization and wrap them into one number has seldom satisfied economists.

But most agree that increased productivity is the key to improv-ing a society's standard of living. As productivity rises, workers' wages and corporate profits can be increased without diminishing the value of currency or heightening inflation.

The United States is still the most productive nation in the world overall, according to economists, but other nations are fast closing the gap and have overtaken U.S. workers in key areas like steel production.

Frontier Air To File Under Chapter 11

Compiled by Our Staff From Disp DENVER - People Express Inc. announced Wednesday that it had failed to find a buyer for its Frontier Airlines subsidiary and that Frontier would file for protection from its creditors under the

U.S. bankruptcy code.

By midday, however, papers had
not been filed that would place Frontier under Chapter 11 of the U.S. Bankruptcy Code, leading industry sources to believe that People Express was making a last-ditch effort to avoid that step.

Feople Express spokesmen made conflicting statements on Wednes-day. One said, in response to inqui-ries, that People had failed to sell Frontier and would place it in bankruptcy proceedings Wednes-day; another said a filing may not take place at all.

United Airlines agreed last month to buy Frontier for \$146 million, contingent on reaching agreement with the carrier's labor unions, but talks between the pilots' union and United have been fruitless.

Thomas A. Germuska, a United spokesman, said Wednesday that the carrier still had an agreement to buy Frontier but that the transaction would be more difficult if Frontier files for protection.

Fronticr, which has been having a loss of \$1 million a day. Jamie Lindsay, vice chairman of David Phillips, director at Bier- clients who want to trade with the London market. GM, Suzuki Announce Canadian Auto Venture

Wednesday to set up a \$360-mil- of teamwork and dedication." lion joint venture that would produce 200,000 vehicles a year and make substantial use of U.S. and Canadian parts suppliers.

The venture, which had been expected, would produce cars that for sale in Canada. meet standards of the Canada-U.S. auto pact, officials said

Suzuki thus would become the first Japanese automaker to operate under terms of the 1965 pact, allowing its vehicles to move duty free into the United States from

The companies did not immediately announce a site for the new venture, but it was expected to be in southern Ontario. It would produce 120,000 subcompact cars and 80,000 sport-utility vehicles a year for Canadian and U.S. markets.

The plant would employ 2,000 people when it reaches full production sometime after initial operations begin in 1989, the companies.

different skills, working together to allowances and union recognition.

Create something exciting and The CAW official said that Sucreate something exciting and new." GM's chairman, Roger B. zuki had recognized the union

TORONTO - General Motors ment. This partnership will proof Canada Ltd. and Suznki Motor duce not only new products and Co. of Japan announced plans new processes but also a new sense

GM Canada's parent, GM Corp., owns 5.3 percent of Suzuki. GM Canada currently imports from Japan Suzuki-made Chevrolet Sprint and Pontiac Firefly models

GM and Suzuki said substantial purchases of parts would be made from U.S. and Canadian suppliers. They said the goal was to meet auto pact levels, which guarantee Cana-dian content and production-tosales ratios, in the first years of operations

While GM and Suzuki will be equal equity partners in the ven-An official of the Canadian Auto Workers said that the union already had met with Suzuki to discuss a potential contract.

The union said Japanese management would operate the plant under a "team concept" familiar in Japan, while workers will have traditional North American contract "ft's a partnership of people benefits that include seniority rec-from different countries and with ognition, transfers, cost-of-living

Sedgwick Profit Rises 18%; Takeover of Crump Planned

LONDON — Sedgwick Group PLC, Britain's largest independent insurance broker, said Wednesday that it had acquired Crump Companies Inc., the eighth-largest U.S. broker, for about \$307 million.

Sedgwick simultaneously announced a 1-for-6 rights issue to raise about £186 million (\$275 million) to help finance the acquisition. The announcements came as Sedgwick released interim results for the half-year ended June 30. It said pretax profit rose 18.5 percent to £92.6 million, from £78.1 million.

Sedgwick also said that its board expects to recommend a fina dividend on the half-year results of 8 pence, making a total of 12 pence for the year. That is up from 7.75 pence and 11 pence for 1985 Sedgwick said the acquisition of Crump, which reported 1985 earnings of \$11.8 million on revenues of \$98 million, depends on the consent of a majority of Crump's shareholders. Sedgwick said that holders of 38 percent of Crump's shares already have agreed to vote

It said the acquisition of Crump would strengthen its position in the Southern and Western United States and add to its brokering and management strength. Sedgwick last year acquired another U.S. brokerage, Fred S. James & Co., from Transamerica Corp. for about £530 million in Sedgwick shares.

Sedgwick shareholders can subscribe one new ordinary share for

every six existing ordinary shares and one new "A" ordinary share for every six existing "A" ordinary shares held on Aug. 22 at 315 pence Transamerica holds 68.4 million "A" shares and 73.7 million ordinary shares, representing 39 percent of Sedgwick's equity and 29 percent of its votes. It will maintain its investment in Sedgwick and

plans to take up its rights to 12.3 million new ordinary shares and 11.4 million new "A" ordinary. The balance of the issue, 37.1 million new ordinary shares, or about 61 percent of the total issue, has been underwritten by the merchant

bankers N.M. Rothschild & Sons Ltd. Sedgwick said the balance of the Crump purchase price would come

from the group's existing borrowing facilities.

U.S. Tax Bill Expected to Trigger Rush of Mergers

COMPANY NOTES

To Revise **Unitary Tax**

On Firms By Robert Lindsey
New York Times Service
SAN FRANCISCO — The Cali-

rinia legislature, to the approval lobbyists from Japan and British, has voted to overhaul the state's unitary method of tax on multinational corporations.

Ending a 10-year dispute, legisla-tors voted Tucsday in effect to scrap the system of taxation by granting multinational corporations an option to pay a special fee in lieu of the tax. The measure, which Governor George Deukme-jian has indicated he will sign, is expected to save the companies many millions of dollars a year.

Under the unitary method of taxation, the state had based the tax it charged companies that oper-ate both in the state and overseas a a percentage of their worldwide polits. If state officials determined that 10 percent of a corporation's business was conducted in Califor nia, then it levied a tax based on 10 percent of its global profits.

The unitary method of taxation was introduced in an effort to pre-vent companies with many divi-sions from concealing profits by shifting income from one subsidiary to another.

But the system has come under mounting criticism from many quarters, including multinational companies such as Japan's Sony Corp., which argued that it was improper to tax profits generated outside the United States. The Reagan administration supported Britain and Japan in trying to overturn the unitary tax.

Domestic companies, especially those in the electronics industry what compete with Japanese com-panies, contended that doing away with the unitary method of taxation would provide an unfair edge to their competitors.

The measure approved Tuesday by the state Assembly and Senate gave both sides much of what they had sought, but it will cost the state treasury \$83 million a year.

Under the compromise, corporations will be given a choice of tax-ation when the bill takes effect in 1988. One option would be to continue to pay the state's 9.6-percent corporate tax based on worldwide earnings, with the amount determined by the percentage of their total payroll, property and sales in California. The other would be to pay a tax based on the proportion of operations in the United States.

If they elected the second choice, multinational companies would have to pay an annual fee equal to 0.03 percent of their California sales to a new fund that will be used to finance sewers, water lines and other public works projects at new industrial developments in the

Anderson Clayton & Co., a U.S. food conglomerate, said it had a definitive agreement with 13 banks to Harvester, said it will reduce its U.S. marketing and provide \$255 million of the \$480 million required to administrative staff by 20 to 25 percent and change buy back 8 million of its shares. IEP (U.K.) said it plans to offer £258 million (\$381 about \$40 million.

Chicago Pacific Corp. said it acquired the furniture group America Inc. from General Mills Inc. for \$83.5 million. The group is made up of Pennsylvania House and Kittenger, which had combined 1986 sales of \$91 million for the fiscal year ended May 31.

Gould Inc., a major U.S. electronics maker, said it will sell its defense systems division, which accounts for more than a quarter of its annual sales, to concen-

certain provisions of its health benefit plans to save

million) in cash for Ocean Transport & Trading PLC, a diversified shipping and storage concern. Ocean Transport later rejected the offer as unacceptable. One of IEP's owners, the Briefley group, already holds 9.8 percent of Ocean Transport.

Chicago Pacific Corp. said it acquired the furniture from Northern Telecom Inc. and \$80 million for a computerized telephone-traffic observation system from AT&T International Inc.

Norsk Data AS, an Oslo-based computer maker, said its nonvoing "B" shares will be quoted on the Copenhagen bourse beginning Thursday, to facilitate growing Danish investment in the company and give it access to Denmark's money market.

for more than a quarter or its annual trate on commercial electronics.

MIM Holdings Lat. said it will spend 6.1 million had a net profit of 61 million pesos (53 million) in Australian dollars (\$3.69 million) to build a demonstration plant for its isasmelt smelting process at its profit after its new management curtailed free rides to officials and adopted other measures to boost revenue.

Yen Sector Draws Most Attention

مولدًا منه المنصل

By Christopher Pizzey

LONDON - The yen sector was the feature in the primary mar-

ket Wednesday. The expected 60-billion-yen issue emerged for Austria, and there was a highly successful 20-billion-

yen equity-warrant bond issue for a Swiss Bank Corp. subsidiary. The straight secondary market sectors generally ended slightly easier after quiet trading as hopes faded that there would be a further round of international interest-rate cuts soon, dealers said.

Besides the yen sector, the primary sector was relatively quiet, with no new plain dollar straights being launched. Austria's two-tranche ven bond

issue was felt by dealers to be on the tight side and both parts ended bid on their total fees. The 40billion-yen, 10-year tranche pays 5% percent and was priced at 101%, while the 20-billion-yen, 15-year tranche was priced at 101% and has

a 5%-percent coupon. The lead manager was Daiwa Europe Ltd.

was quoted at a discount of 21/4 bid. The other issue of the day was for SBC Finance (Cayman Islands) Ltd. The 20-billion-yen, seven-year bond issue pays an indicated cou-pon of 2 percent and was led by

Swiss Bank Corp. International. Each bond has 21 warrants attached, each of which is exercisable into a bearer participation certificate of the parent bank and guaran- 31/2 percent. tor, Swiss Bank Corp. The price

will be fixed Sept. 1. The combination of the opportunity to invest in a prime Swiss bank name coupled with the recent surge in share prices internationally meant that the issue became an credit policy. instant success with investors. Swiss Bank Corp. International

issue price. In very late trading, the expected launch for Electricité de France emerged as a 20-billion-yen bond manager was Yamaichi Interna-The first tranche closed at a dis-tional (Europe) Ltd.

Den Danske Provinsbanken A/S launched \$100 million in five-year floating-rate notes paying the sixmonth London interbank offered rate with no margin. The issue was lead-managed by Shearson Lehman Brothers International and

did not trade widely. Nippondenso Co. launched a \$100-million equity-warrant bond issue with an indicated coupon of

Back in the secondary markets, dealers said there was some disappointment about the comment from the governor of the Bank of Japan, Satoshi Sumita, that oow is not the time for a further easing of

Also hurting sentiment was the news that the Bundesbank would quoted the issue at 104½ bid, 105½ oot hold a press conference after its asked at the close, far above its par council meeting Thursday. Although this did not in itself rule out a discount or Lombard rate reduction - there was no press conference before the last cut - dealers issue paying 5% percent over 10 said they felt that the discount rate years and priced at 101%. The lead would be left unchanged, though a reduction in the Lombard rate was

CADBURY: Beverages Gain Strength Over Chocolate

(Continued from first finance page)

million, compared with a pretax profit of \$49.3 million in 1984. The 1985 loss would have been greater if not for a profit of \$1.6 million in drinks. Total revenue for the North American operation in 1985 amounted to \$464 million, down 40 DETCEDL

To correct the situation, Cadbury embarked on a major restructuring of its North American operations, streamlining the group into two product-related divisions, from seven; reducing the number of management levels and eliminating more than 30 percent of the group's North American executives.

The company said that it intended oow to focus on successful "niche" products, such as the Cadbury's creme egg, a hollow chocolate egg filled with cream, rather than taking on its major competitors.

Last year's fall in profits severely undermined the London financial Schweppes. But company moves, such as shedding its unprofitable health and hygiene division and domestic food and beverage division through management huyouts, to manufacture artificial mineral have restored some confidence.

The acquisition of Canada Dry and Sunkist should give Cadbury a niche in mixers a market that has been growing as adults shun sweet drinks. The company, in fact, prefers to describe its niche as "adult soft drinks," pointing out that many of its products are consumed on their own.

And like its other drink busines its investment in Dr Pepper allows the company to avoid direct confrontation with the Coca-Cola and Pensi behemoths

For Cadbury Schweppes, balancing the confectionary and bev-

district'e confidence in Cadbury ble British companies: Cadbury, which was founded in 1824 as a cocoa and coffee business, and Schweppes, which was founded in 1793 by a Swiss emigrant to Britain

For the company overall, confec-tionary still holds a slim edge over

That is partly because Cadbury's confectionary business is receiving some good news in Britain, where it has about 30 percent of the market. For years Cadbury, once the biggest British confectionary company, had been losing ground to Rowntree Mackintosh and Mars.

But recently it has had a marketing triumph with Wispa, a bar of aerated chocolate. Last year, in its first full year of national distribution, Wispa became the third besterage business is a century-old ex- selling brand in the market, and perience. BOOKS

THE FRENZY OF RENOWN: Fame and Its History

By Leo Braudy. 649 pages. \$27.50. Oxford University Press, 200 Madison Avenue, New York, N. Y. 10016.

Reviewed by Erich Segal

IN 1967, while working on the film "The Yellow Submarine," I had to consult with the Beatles late one evening at the Abbey Road studios where they were recording. As my taxi pulled up, a throng of teen-age girls swarmed around it. Upon spying me, one perceptive adolescent cried, "Aw, it's nobody!" I could only soothe my bruised ego by recalling that Odysseus had once posed as "Nobody" to odyssess had once process of the action of the anti-hero, in contrast to Achilles who chose a short and glorious life over a long and inconspicuous one.

Leo Braudy's remarkably ambitious book traces what he calls the "metamorphic" con-cept of fame as an ever-changing but always accurate cultural barometer from the early Greek notion of a single hero striving for "deathless glory" to our own age, which Andy Warhol has characterized as one in which everyone will be famous for 15 minutes. It is an impressive tour de force, in which the author is at various times historian, art and literary critic, philosopher, philologist, and media maven. Brandy begins his history with Alexander the Great, who "created a vocabulary and a

group of gestures" that were reproduced by others. But Alexander, himself captivated by the precedent of Achilles, was haunted by the fear of being unable to live up to the reputation of his heroic paragon. He traveled everywhere with the Hellenistic equivalent of a press corps, consisting of historians and poets whose task it was to immortalize his deeds. But, according to an oft-told legend, Alexander broke down at the tomb of Achilles, sobbing that he had no Homer to sustain the memory of his exploits.

In one of his best sections, Braudy describes the Roman obsession with Alexander, especially on the part of Julius Caesar, who emerges as a fascinating figure, a conscious actor in the drama of his own composing: "'Caesar' is a concept to Julius Caesar, the public version of himself, connected to yet different from his private name, a separate self that he constant-ly reshapes and redefines."

Here, as throughout the book, Braudy's vision is all-encompassing. Discussing the importance of histrionics in the careers of Julius Caesar and his nephew, Augustus, he remarks, "A clear continuity in the interplay between theater and politics stretches from the theater of Pompey (55 B. C.) to Renaissance

Mahom England down to the John F. Kennedy Centi-for the Performing Arts." He might well have added Ronald Reagan. For, while Cicero was merely tutored by the famous actor Roscius, American politics fuses the personae of player and politician.

The author reminds us that the age of Au-

gustus was also the age of Christ, whom Satan unsuccessfully tempts with the promise of earthly glory. "Yet at the same time His career furnishes a pattern of grandeur from His refusals, a theater for His reticence." This contrast — and conflict — provides the central theme for most of Braudy's book, for it characterizes nearly two millennia of history between Augustus and Jesus and Napoleon. During this time we observe a constant ambiguity about fame itself — a tug-of-war between Roman ostentation and Christian inwardness, between artistic self-assertion and withdrawal. There after came "the democratization of fame, which occurred in the 18th century when the revolutions in France and the United States radically broadened the potential constituency for celebrity. Suddenly anybody could aspire

to be an Alexander. The variations of this theme are remarkably profuse. To accommodate them, Brandy often treats complementary or contrasting pairs within a single period; for example, the graphic artists Mantegna and Dürer, Shakespeare and Ben Jonson, Rousseau and Franklin, Byron and Napoléon, Hazlitt and Keats, Carlyle and Emercan Emily, Dichington and Walt White. Emerson, Emily Dickinson and Walt Whitman. The author has incisive observations on how changes in media — codex, the priming press, daguerreotype, photography, radio, film and television — affected the perception of

He also deals with the handmaiden of fame commonly known as "fan hood." He cites
Roswell as the first and paragonal fan, and
with good reason, since Dr. Johnson's biographer also made adoring pilgrimages to meet.
Voltaire and Rousseau. But it is safe to assume that there were fans from the moment there

Braudy is at his most thought-provoking and imaginative in discussing American fame. In the New World, he writes, "the pursuit of selffulfillment seemed to be an injunction from the Founding Fathers themselves." Ben Franklin set the pattern of a new concept of personal fame, which was "ashamed of no origin."

To call attention to the tiny lapses of a book of this scope would be unfair. Every reader will enjoy finding a few things he might have added. Verdi, for example, is a wonderful illustration of 19th-century fame in the best sense—a national idol composing in an international language, using grand subjects from history to demonstrate his ideals of peace and the unifcation of Italy. But then, perhaps the book is

already a bit long.

By the way, Achilles, who chose glory and a short life, had a chance to think things over in, the underworld. At the time he was visited by Odysseus (in "The Odyssey, Book II") he had concluded that he would rather be the most wretched being on earth than king of all the dead. It was, of course, too late.

Erich Segal, a classical scholar and novelist, wrote this review for The Washington Post.

Classical Concert for Refugee Aid The Associated Press

GENEVA - The UN High Commissioner for Refugees announced plans for Classic Aid; a Sept. 30 concert here which it hopes will raise \$2 million to aid refugees. The concert will feature Lorin Maazel conducting the Monte Carlo Philharmonic.

SCIENCE INTHE HTEVERYTHJIRSDAY, A FULL PACE ON L RECENT DISCOMBIES IN SCIENCE AND MEDICINE

SPORTS

The formal state of the latest the formal state of the formal states of

State of the part of the part

such a revival be done so quantification in this theme are despite the company it keeps each solution in the same and particular or company it keeps each shafter has a battle retaining his conclusive the conclusive that have a good for the moment. D.J. Dozier heads are the different and frank field up. Now it has an experienced on a wave of running backs, while shand frank it did up. Now it has an experienced on a wave of running backs, while shand frank it would be far more order to be strength on defense.

Syracme has moved into the contender's spot in the East after contender and the East after contender and the East after contender an

All the handmider of an book of the handmider of the hand

Michigan probably have the strongest defenses, so the Sooners and Wolverines are picked to finish where they did last year—first and second.

Miami may have the best passer in the country in Testaverde. Mike

new concept of h in the country in Testavener, but he southed of no are Shula is not as spectacular, but he

Dickinson and the coach; success snoons of the more on detense.

Syracuse has moved into the Syracuse has moved into the contender's spot in the East after years of running well behind Penn years of running well behind Penn Holieway (at Oklahoma), Jim Harton College. The Orange hopes are high because of Don McPherson, high because of Don McPherson, high because of Don McPherson, who set a school record of 12 touchdown passes in 1985. Scott Schwedes is a superb receiver.

West Virginia's schedule is so strong that the Mountaineers may not be able to repeat their 7-3-1 record. Pitt has a new coach, Mike ed team in the nation going into the Gottfried from Kansas, and it will 1985 season and the Wolverines take time. Charles Gladman, a running back, may be the Panthers' best chance.

SOUTH because of the strong defense that are gone, but Michigan replaces

to handle it (Van Tiffin, a superb field-goal kicker, adds an extra element). Florida has lost running backs Neal Anderson and John Williams, so quarterback Kerwin Bell must carry even more of the load. Louisiana State's strength is de-

fense as Coach Bill Arnsparger tries to fill the offensive backfield spots left vacant by the departures of Jeff Wickersham, Daltoo Hilliard and Garry James. Anburn, mious Heisman Trophy winner Bo Jackson, cannot be rated as highly as it has been the last few years. Running backs Kenny Flowers

and Alvin Blount return to lead Clemson and Maryland, respectively, in the Atlantic Coast Conference. Quarterbacking is less than the best for those two teams, but good enough to win in the league.

Miami and Florida State again

represent the South's nonaligned strength, with the Hurricanes possibly the best independent team in gan — possibly too much for a the nation. The 6-foot-5 (1.95-me-clean state in 1986. ter) Testaverde threw for 21 TDs and more than 3,200 yards in 1985. He has experienced running backs and works behind an offensive line that lost only one starter. FSU has Chip Ferguson back at quarterback after he took the team to an upset victory over Oklahoma State in the Gator Bowl.

MIDWEST Michigan was the most underratcame through with a 10-1-1 mark. Coach Bo Schembechler will oot have that advantage this time. Har-SOUTH baugh is back, along with the Coach Johnny Majors is excited team's top four rushing backs from about Temessee's chances in the the squad that beat Nebraska in the Southeastern Conference, largely Fiesta Bowl. Five defensive starters

Karsatos, a big quarterback who return to Oklahoma, which wound passed for more than 2,300 yards in 1985. He can throw again to Chris should repeat despite a tough early Carter, an excellent receiver. And schedule. Holieway will direct the the usual strongmen are on both lines and at linebacker. The Buckeyes were to open the season Wednesday night against Alabarna; they wind up against Michi-

Coach Joe Paterno will turn 60 in December, just before Penn State's 100th football

team - and his 21st - plays in another bowl game.

Michigan State, because of Lorenzo White, the nation's top run-Michigan and the Buckeyes. No team can lose a key rmning back Long, as lows has, and expect to repeat as the Big Ten champ. Illinois also lost oo much talent, including quarterback Jack Trudeau, to contend seriously.

The Big Eight has the usual two-team race: Oklahoma vs. Nebraska. Give a solid edge to the Sooners and put the other six in line behind Nebraska. Colorado may surprise seen. Derrick McAdoo is one of four and replace Oklahoma State as experienced running backs at Baythird best this year.

Coach Barry Switzer has some talent (including Tony Casillas, the all-America nose guard), but 10

Ohio State is strong with Jim starters on offense and 8 on defense wishbone from behind one of the biggest lines in lootball, an experienced offensive front averaging 278 pounds (126.1 kilograms) a man. Nebraska falls short of Oklaho-

ma, probably because its quarterbacking will not be as good - and certainly because Doug DuBose, ninth in the nation in rushing last year, underwent surgery Tuesday to repair a left-knee ligament tear sustained in a scrimmage last week. DuBose will be out for the season. Coach Bill McCartney turned Colorado around last year by producing a 7-5 record after a 1-10 season in 1984. The change came after a switch to the wishbone offense.

SOUTHWEST

Texas, once the overlord of the Soothwest Conference, is now chasing archrival Texas A&M. The Longhorns might just catch the Ag-gies, but there's also Baylor to give

the race some spice. Texas A&M returns with major league strength and depth. Murray, ning back last year, may move into at quarterback, and Keith Woodthe best position to challenge side, a solid runner and receiver, work behind a rebuilt offensive line that includes Marshall Land - 6and a quarterback like Chuck foot-7 and 335 pounds - at guard. The entire front seven of the 4-3 defense is back, including Johnny Holland, an excellent linebacker.

With a revamped staff under Coach Fred Akers, Texas will emphasize speed instead of strength. Whether or not that will be enough for the Longhorns to improve (and for Akers to remain) remains to be SWC hard in the last few years. lor, which has eight defensive starters returning from a team that held and offensive coordinator Homer each opponent to 21 points or less. Smith, UCLA might beat any team

Lou Holtz, an experienced coach whose task it is to restore Notre Dame's winning tradition.

ers from a small but good team to be much of a threat for the SWC with excellent results. Senior Matt title, and Southern Methodist faces a major probation penalty. Texas starters return on defense. Win or known quality quarterbacks in major college football.

"I let little things get the open titlist." I let little things get the open titlist. "I let in the second set, got the second set, got the second set, got the second set, got the second set and started playing really well. He second set and set are second set, got the second second set, got the second set, got the second set, got the second second second set, got the second seco McEnroe ignored the planes he had once in screamed at. The crowd's constant buzz never caused so much as a look, much less a

glare. Line calls drew an occasional raised eyebrow, but that was it.

Although McEnroe had defeated Annacone
in an exhibition only four days previously, be
said the had not been ready for the match. "It's a
state of the ready for the match. "It's a
fourth set. matter of my getting to a point.... I don't "know if you can turn it on and off," the No. 9 "Seed said. "The switch was on for eight or nine life to win," said Annacone, who is ranked 20th tyears, then the switch was flickering and I

popen, and marks only the second time he has he isn't match-tough yet."

Paul Amacone, after beating McEnroe ... I'm glad I won, but sorry he lost."

ever lost in the opening round of a grand slam championship (he did so against Erik van Dil-len at Wimbledon in 1978).

Annacone was clearly edgy in the first set, which McEnroe took easily with breaks in the fourth and sixth games. He was unable to break again; Annacone, meanwhile, broke twice in each of the second and third sets, and gained the decisive break in the sixth game of the

"My brother and my coach had both told me that I didn't have to play the best tennis of my worldwide. "They said he was still rebuilding. I wasn't sure about that until midway in the third set. Then, I realized that if I could get ahead, it would be tough for him to come back because

always been just a shot short against the best players. As he and McEnroe passed in a hall-way after the match, he said softly, "John, I'm sorry."
He meant it. "It was awkward for me," An-

nacone said. "John is such a great champion and has done so much for tennis that I feel bad he lost. I'm glad I won, but sorry he lost. It's a strange feeling. But I really hope he does come back. If anybody can do it, he can."

Not since 1969, when Tom Okker lost to Mark Cox, has a previous year's finalist been eliminated in the opening round. Defending champions Ivan Lendl and Hana

Mandhkova both won their openers in straight sets, as did the No. 1 women's seed. Martina Lendl, who defeated McEnroe in last year's

final, followed his vanquished rival on center court and had little trouble disposing of Glenn Layendecker, 6-3, 6-2, 6-0. "It doesn't affect me at all," Lendl said of

Seguso in the second round. Eventually I could have played McEnroe in the quarters, but it's a long way there for me and for him. For him it proved to be too long."

Mandhikova crushed Marie-Christine Calleja

of France, 6-2, 6-2. The fourth-seeded Czechoslovak needed only 55 minutes, breaking ser-

Mandlikova hopes to avoid reinjuring the right ankle she sprained two weeks ago, but she said that returning to the site of her third grand slam title buoyed her spirits. "I do feel at home here. I really love to play here. Driving up I saw the statium and I had a great feeling. You know, I love the place."

Navratilova broke service in the third game each set, and added a final break in the seventh game of the second set in downing Andrea Holikova, 6-4, 6-2. The left-handed Texan committed only four unforced errors, all off her forehand, and said she was pleased with

her performance. After his defeat, McEnroe had said: "I'm not into the matches as much as I was before I

stopped playing."
That caused Navratilova to reflect. "If I had six months off, I know I'd be in better shape than I've ever been in for tennis," she said. "But mentally — that's the hard part." (UPI, WP)

The Real-Estate Rich

mittee of Congress indicates that the concentration of wealth in this country is falling into the hands of fewer and fewer people. The conclusion is that the rich are getting richer and the poor are getting

I don't know why this should come as such a big surprise to anybody. A recent survey I took shows most of the wealth in the U.S. is now in the hands of real estate tycoons, and for the last few

has spread in Buchwald

Texas and Oklahoma oil men. It is this disparity in earnings between real estate and oil that is leading to class warfare in the country. A crude-oil wildcatter, who was

living in the Dallas Greyhound Bus Terminal, told me, "It's not right that the real estate people should have it all, and the rest of us be on our keesters. If you don't spread the wealth around, the oil people at the bottom of the pile are going to rise up and take their share by

"But didn't you oil fellows have all the money a short time ago?" "We had some, but that was only because oil was selling for \$32 a barrel. At those prices we could afford to buy whatever was for sale. But when the oil plunged to \$11 a

Hokusai Print Blocks Discovered in Boston

The Associated Press BOSTON - The Boston Museum of Fine Arts said Tuesday it has found in storage what it believes to be the only complete and original sets of Japanese wooden printing hlocks designed by the 19th cenm-ry artist Katsushika Hokusai.

"It's really not that big a deal," said the Hokusai scholar Roger Keyes of Woodacre, California. Keyes said the Boston wood blocks appeared to have been carved later than the museum said they had been made, and that they were not the blocks used for the original editions of artist's four books.

WASHINGTON — A report barrel they took away our Master-cards."

"So from being rich you became poor overnight."

What else? Don't let anyone tell you the rich always get richer. In the oil business the rich get poorer. There's nothing as sad in this world as yesterday's millionaire."
"And to think that at one time you had it all."

"I don't know if I had it all, but I had whatever was out there. We were such good customers at Neiman Marcus that, when my wife told them she couldn't afford to shop there any more, they retired her Adolfo jersey so that no one could ever wear it again."

I said, "But one thing nice about being a poor oil man is that overnight you could become rich

"Not with those OPEC hums glutting the market. Every time one of them lowers the price, another American oil producer goes on food stamps."

I decided to seek out a real estate mogul who is getting richer. I found him looking out of his new tower office building which took up 20 acres of Central Park (he had gotten a variance from the zoning

"Is it true that people of your ilk are up to your eyeballs in hard

"We make a living." The oil people say you're filthy

"What would you expect them to say? They're all poor. They were once rich. They say

it's an outrage that people like you are gohbling up the wealth in the country."

"They should have gone into a business with some decent tax "Do you believe it's good for society that millionaires like your-

self have three houses, a yacht and an airplane, while Texas oil men are capping their wells?" "I don't know why real estate people should have to do without the necessities just because oil men don't know how the system works.

Maybe we're rich, but did anyone ever ask how we got that way?" "How did you get that way?"
"We did it the old-fashioned way — by using other people's money.

Wealthy Young **Find Fulfillment Giving to Causes**

By Kathleen Teltsch New York Times Service

DOSTON — Annie Hoffman is far from being a dilettante do-gooder. She works hard at her

pottery business - and at giving away her money. At her pottery wheel, Hoffman sees a link between the clay she is kneading and her inherited wealth. "Like working the clay, giving away my money freed me from being bottled up inside and

let the fizz out." Hoffman, 31, contributes about \$10,000 a year to the Hay-market People's Fund, a foundation in Boston that supports neighborhood groups throughout New England. She has also run 10 Haymarket workshops for other wealthy people, most of them in their 20s, who want advice about their inheritances.

"The phenomenon of young people with progressive political sympathies acquiring money through the lottery of birth is be-coming increasingly common," said George Pillsbury, who helped found the fund in 1974.

At least 14 community-based foundations have formed across the United States, modeled on Haymarket and on Vanguard, which was started in San Francisco in 1971. Haymarket has become known as a supporter of community groups, defending the rights of low-income tenants, single parents and the disadvantaged. A group in Concord, New Hampshire, Parents for Justice, aids welfare mothers.

Other such foundations include North Star in New York, Crossroads in Chicago and, more recently, Live Oak in Ansim, Texas. All were established with the assistance of young donors who advocate "change, not charity" and give money to groups organizing poor people and to people dis-criminated against because of color, sexual preference, physical and mental disabilities, religion

about having money," Hoffman said. "They feel something is not right and question. What can I do? Maybe I won't see results in my lifetime, but giving away mon-ey allows me to be part of the

When she was 21, Hoffman received an inheritance left by her grandfather but ignored it for years, because she could not accept the idea of having money.

Hoffman said she learned about social inequity firsthand when she met Carole Fer at a pottery-glazing class. The two later became partners, making and selling ceramics.

"We couldn't be more different," she said. "I am as WASPy as one can get. I went to private school and was so privileged and protected I was virtually encased. Carole came from a Jewish family that survived the Holocaust, and she worked as a wait-

cal exhaustion. We talked a lot about class issues, and I learned what survival meant for her and for me. Two years ago the artists pur chased a corner store and opened

"Clayground" with help from

Hoffman's mother, Ruth, who be-

ress at night to the point of physi-

came a Haymarket contributor. Another substantial donor to Haymarket, Eddie Frazer, 24, grew up in Winnetka, Illinois, and, although from a Protestant family, was drawn by her study of Judaism to live at a kibbutz in Israel. She said she was impressed by the way kibbutz members used their leisure time to fulfill themselves with music and other cultural pursuits. In the United States, she said, pressures to compete and succeed are all-consuming and "nothing is ever enough." She returned to the United States and, for the first time, wanted "to take hold and work with the trust

funds" left by her father. Frazer discovered Haymarket while doing research on unconventional giving. Last year, her "Some people feel horrible philanthrophy amounted to

Annie Hoffman in ber studio: Giving away her inherited money "freed me from being bottled up inside."

\$22,000. Frazer, who has taught away money in Harvard Square."
English to Haitians in the Boston "It sounded wonderful," he area, has also advised college students about inheriting wealth, emphasizing that they need not feel alone or secretive

David Pillsbury Becker, a curator at the Boston Fine Arts Museum, gravitated toward Haymarket after receiving a letter in 1976 from his family's attorney mentioning that Becker's second cous-

said. Becker walked to Harvard Square, found the Haymarket office two flights above a Chinese restaurant and introduced himself to Pillsbury, saying, "I like what you are doing.

Haymarket attracted Becker partly because its grant-giving de-cisions are made by a board com-posed of local activists. He gives in, George Pillsbury, was "giving away 60 percent of the income

from an inheritance left by his mother and father, who was a banker. For 10 years, he has supported Haymarket and environmental, arts and homosexualrights groups. "I grew up isolated by birth because of the money

and later because I was gay," Becker said. "I lived in a double closet as a member of two minor-rties, one at the top of society and one near the bottom." As a college junior, with a \$50,000 annual income, Becker

habitually wore denim jeans with holes. "Yes, I felt guilty at the time about being rich, but guilt is not very productive. Now I say, I'm gay and rich, and here I am. Can we work together?" Pillsbury's mother, Sally, had first suggested he contact Obie Benz, who was using his inheritance from his family's Sunbeam Bread fortune to create a foundation called Vanguard on the West Coast Benz says Vanguard was the culmination of his years of community involvement and political activism against the Victnam War while a student at

Middlebury College in Vermont in the late 1960s. Vanguard financed one of the country's first shelters for battered women and a crisis center for rape victims. Benz also helped write a handbook about alterna-tive giving called "Robin Hood Was Right."

Pillsbury and Benz have moved on to new undertakings, but their foundations have prospered: Vanguard, started with \$60,000 rolled together by Benz and a few friends, gave away \$360,000 last year. Haymarker's first funding board gave away \$40,000; last year it distributed about \$400,000.

Pillsbury is now a development officer at Jobs with Peace, a group advocating that military spending be lowered and some of these funds diverted to housing, health, mass transit and public educa-

Benz, now a filmmaker living in Manhattan, was nominated for an Academy Award for "Americas in Transition," a 1981 documen-tary attacking U. S. policy in Central America. Because he sees films as the most effective way to influence large numbers of peo-ple, Benz is trying to put together \$20 million to finance 10 lowbudget films, some of them about social justice and others in a

Prince Struts His Stuff For 5,000 in Frankfurt

Prince took 5,000 West German fans by storm Tuesday night when he strutted on stage in Frankfurt in a wide-brimmed black hat, high heels, a tight black costume and a gold chain encircling his hips. He sang his chart-topping singles including "1999," "Kiss" and "Raspberry Beret" and raised a roar of laughter when he asked: "Are there any German shepherds in the house tonight?" before launching into "How much is that doggie in the window?"

A chess magazine in Moscow has printed the first work by Vladinar, Nabokov ever openly published in his native land, halling the oncebanned émigré anthor as a master of language and metaphor. Publi-cation of a 2,000-word excerpt from Nabokov's memoirs in the magazine 64 came nine years after he died and more than 30 years after his novel "Lolita" became a sensation in the West.

Wayne Hoover says the makers of Old Style beer and Jack Daniels Whiskey should be required to warn people of the evils of the spirit trade. Hoover, 24, who claims he fell into the trap of Old Style and Jack Deniels as an unknowing high school student, filed a \$5,000 damage suit Tuesday in Chicago. The suit also seeks to force the Jack Daniels distillery and the G. Heile-man Brewing Co. to place warning stickers on their products. "All we want is for the distillers, brewers and the liquor industry" to know that there is a very serious problem out there," said John Mack. Hoover's attorney. Hoover claims he has suffered weight loss, abnormal sleep patterns, property loss, loss of driving privileges and loss of income from potential employment because of alcoholism.

Western New England College officials are entitled to refuse admission to a man accused of rape because officials feel his presence would disturb women students, a court has ruled in Springfield, Massachusetts. Judge William Welch's decision Tuesday rejecting Michael R. Hoffman's request for a preliminary injunction against the 800surdent law school means Hoffman can't begin his studies until the criminal case is resolved.
